

HOW TO USE THE COLOR WHEEL

The Laws of Color state that every color (pigment) can be formed by mixing the three primary colors (yellow, red and blue). Mixing the three natural hair colors contains all three primary colors. The percentages are constant in varying amounts, creating lighter to darker shades of hair color.

To achieve neutralizing colors, you do need OPPOSITE of the Color Wheel. Reddening is commonly known as neutralizing color. For example, use a blue-based shade to neutralize a brassy orange tone.
