Figurine Makers of Prehistoric Cyprus Edgar Peltenburg,Diane Bolger,Lindy Crewe,2019-07-31 The Chalcolithic period in Cyprus has been known since Porphyrios Dikaio's excavations at Erimi in the 1930s and through the appearance in the antiquities market of illicitly acquired anthropomorphic cruciform figures often manufactured from picrolite a soft blue green stone The excavations of the settlement and cemetery at Souskiou Laona reported on in this volume paint a very different picture of life on the island during the late 4th and early 3rd millennia BC Burial practices at other known sites are generally single inhumations in intramural pit graves only rarely equipped with artifacts At Souskiou multiple inhumations were interred in deep rock cut tombs clustered in extra mural cemeteries Although the sites were also subjected to extensive looting excavations have revealed complex multi stage burial practices with arrangements of disarticulated and articulated burials accompanied by a rich variety of grave goods Chief among these are a multitude of cruciform figurines and pendants This unusual treatment of the dead which has not been recorded elsewhere in Cyprus shifts the focus from the individual to the communal and provides evidence for significant changes involving kinship group links to common ancestors Excavations at the Laona settlement have furnished evidence suggesting that it functioned as a specialised center for the procurement and manufacture of picrolite during its early phase The subsequent decline of picrolite production and the earliest known occurrence of new types of ornaments such as faience beads and copper spiral pendants attest to important changes involving the transformation of personal and social identities during the first centuries of the 3rd millennium BC a topic that forms a central theme of this final report on the site *Excavations at Kilise Tepe, 1994-98* J. N. Postgate,David Thomas,2007 These two volumes report on five seasons excavation and four millennia of occupation at Kilise Tepe from the Early Bronze Age through the rise and fall of the Hittite Empire and into the Byzantine era when the mound was crowned by a substantial church The site takes its importance from its position guarding the Goksu Valley one of the two main routes from the interior of Anatolia to the Mediterranean opposite Cyprus so that it gives a record of relations between the interior and the seaboard Of particular interest are the sequence from the Hittite Empire through the end of the Bronze Age and into the classical world and the Byzantine levels associated with the church The multi authored report gives a full account of the stratigraphy and architecture the ceramics and other artefacts and various environmental studies
