

A Living Systematic Review of Problems with Systematic Reviews

We expect best practice from clinical trials, but what's the integrity of the systematic reviews that combine them?

METHODS

Comprehensive searches for literature highlighting flaws in published systematic reviews

Qualitative analysis of the underlying problems

Dissemination and elaboration via a dedicated website with infrastructure to incorporate the emerging evidence base

Problem focussed- not people. The aim is to uphold systematic review practice, but also to scrutinise it

Open to feedback and engagement from the research community and beyond

RESULTS

485 included articles from the first iteration (searches conducted 2022)

67 discrete problems identified across 4 domains that are key to systematic reviews:

COMPREHENSIVE

RIGOROUS

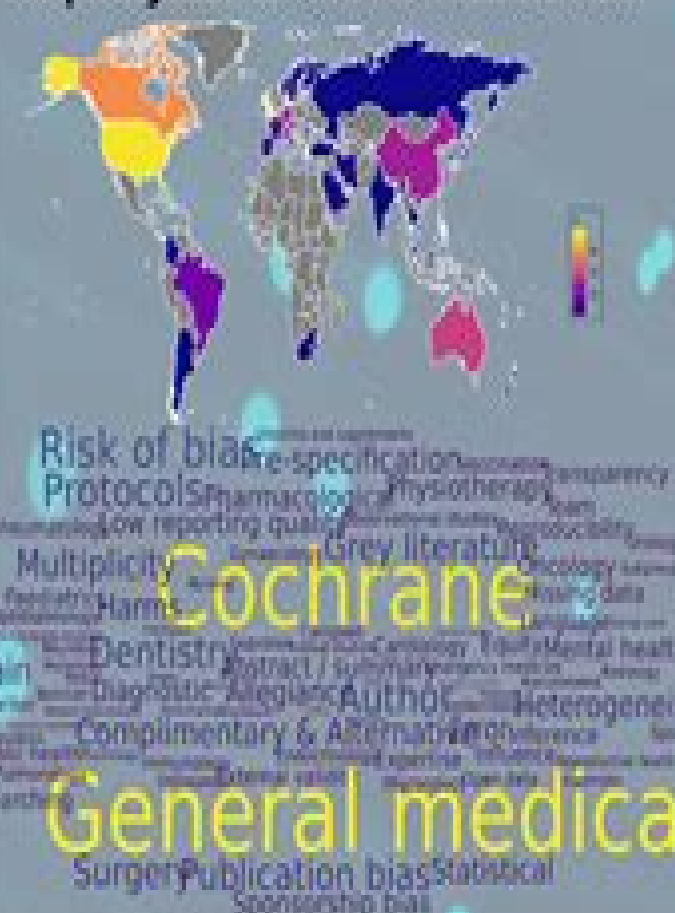

TRANSPARENT

OBJECTIVE

Not all 67 problems are covered by existing systematic review guidelines and methods

This living research aims to be a learning resource to improve the reliability and validity of future systematic reviews
