

ARTICLE/JOURNAL REVIEW FORMAT

Overview:

A critical article/journal review is not one that is inherently negative, but is rather an evaluation of the effectiveness of the argument the author of the article/journal is trying to make. The key word here is *evaluation*—the review is much like an essay in which the writer supports his evaluation of the article/journal. It is intended to give the reader an idea of how the article/journal could contribute to their knowledge of the subject. It is not simply a summary, and indeed, very little summary will be involved. The review should be written in a concise manner and take up less than two pages (about 600 words).

Heading:

At the top of the page, put your name, matrix number, date, and group. The title of the article/journal review will be the citation in APA format of the article/journal.

The Body of the Review:

Cover the following areas in your review. The descriptions below give you many options in the form of questions—you will not have the space to answer each question, so choose the ones that are important for the particular article/journal you are reviewing. You do need to address all of the areas and you must find space for specific examples to support your evaluation. Divide the review into logical paragraphs with effective transitions as you would with an essay. The paragraphs do not have to mirror the numbered sections below; choose the most effective organizational scheme for what you have to say.

1. **Introduction:** Provide background information which is pertinent to the study.
2. **Problem Statement:** It must present something critical that requires the researcher(s) to conduct the research in order to remedy the problem and ensure the long-term survival.
Examples:
In your sentence, you should take an opportunity to:
 - Highlight an existing problem affecting the future survival of an organization...
 - Highlight the present policy or method that is no longer seems to be working...
 - Highlight something that needs close attention such as the increase in customer complaints, declining in sales volume...
 - Highlight current trend, current need, current technology that your organization needs to adapt and change accordingly...
 - Highlight the changes in socio-economic variables such as life-style, consumer income, taste that might affect the long-term survival of your organization ...
3. **Objectives:** What is the author's purpose—what is the researcher(s) trying to accomplish in writing the article/journal?

Research Methods and Design in Sport Management Damon P. S. Andrew, Paul Mark Pedersen, Chad D. McEvoy, 2011

This text explains research design implementation analysis and assessment criteria with a focus on specific procedures unique to sport management *The Process of Research and Statistical Analysis in Psychology* Dawn M.

McBride, 2019-07-17 *The Process of Research and Statistical Analysis in Psychology* presents integrated coverage of psychological research methods and statistical analysis to illustrate how these two crucial processes work together to uncover new information. Best-selling author Dawn M. McBride draws on over 20 years of experience using a practical step-by-step approach in her teaching to guide students through the full process of designing, conducting, and presenting a research study. The text opens with introductory discussions of why psychologists conduct and analyze research before digging into the process of designing an experiment and performing statistical analyses. Each chapter concludes with exercises and activities that promote critical thinking, the smart consumption of research, and practical application. Students will come away with a complete picture of the role that research plays in psychology as well as their everyday lives. **The Doctor of**

Nursing Practice Project: A Framework for Success Katherine J. Moran, Rosanne Burson, Dianne Conrad, 2023-02-15 *The Doctor of Nursing Practice Project: A Framework for Success* Fourth Edition provides a road map and toolkit for students to use on their DNP scholarly project journey starting from conception through completion and dissemination. With a focus on key information for planning, implementing, and evaluating a project, the text also emphasizes the impact that DNP-prepared nurses and well-developed DNP projects have in shaping the future of nursing and healthcare. The Fourth Edition has been thoroughly revised and updated to incorporate the new AACN Essentials and provides greater clarity on the current state of DNP project work. This practical resource features new content on sustainability, knowledge networks, sequential projects, the need for business acumen, financial analysis, and implications; the need to work with stakeholders, as well as the need to use data to validate the problem.
