**Boko Haram's Terrorism and the Nigerian State** Olumuyiwa Temitope Faluyi, Sultan Khan, Adeoye O. Akinola, 2019-03-08. This book assesses the effectiveness of Nigeria's counterterrorist policies against Boko Haram. It takes a critical review of the interventionist strategies adopted by the Nigerian government, highlights the motivations behind the choice of strategies, and proffers a deeper understanding of the factors responsible for the state's inability thus far to rid the country of terrorism. Specifically, it evaluates the NACTEST policy framework that guides the Nigerian state's counterterrorist strategies, which contains both hard and soft power approaches. Adopting historical and case study approaches, which put the Nigerian state and occurrences of violent conflict in context, it takes cognizance of the politics of ethno-religious diversity, which reinforce violent conflicts among groups and against the state, and reviews the socio-economic and political realities that led to the emergence and sustenance of Boko Haram. The volume concludes by suggesting practical policy options for combating Boko Haram and other similar armed insurrection. This book is appropriate for researchers and students interested in African politics, conflict, security, peace studies, terrorism, and counterterrorism, as well as policy makers and government departments dealing with terrorism and counterterrorism.

**Multidisciplinary Approaches to the Study of Stone Age Weaponry** Radu Iovita, Katsuhiko Sano, 2016-05-28. The objective of this volume is to showcase the contemporary state of research on recognizing and evaluating the performance of stone age weapons from a variety of viewpoints, including investigating their cognitive and evolutionary significance. New archaeological finds and experimental studies have helped to bring this subject back to the

forefront of human origins research In the last few years investigations have expanded beyond examining the tools themselves to include studies of damage caused by projectile weapons on animal and hominin bones and skeletal asymmetries in ancient hominin populations Only recently has there been a growing interest in controlled and replicative experiments Through this book readers will be updated in the state of knowledge through a multidisciplinary scientific reconstruction of prehistoric weapon use and its implications Contributions from expert authors are organized into three themed parts recognizing weapon use experimental and archaeological studies of impact traces performance of weapon systems factors influencing penetration depth etc and behavioral and evolutionary ramifications cognitive and ecological effects of using different weapons
