### A Call to Action:

#### Regulate Use of Cell Phones on the Road

When a cell phone goes off in a classroom or at a concert, we are irritated, but at least our lives are not endangered. When we are on the road, however, irresponsible cell phone users are more than irritating: They are putting our lives at risk. Many of us have witnessed drivers so distracted by dialing and chatting that they resemble drunk drivers, weaving between lanes, for example, or nearly running down pedestrians in crosswalks. A number of bills to regulate use of cell phones on the road have been introduced in state legislatures, and the time has come to push for their passage. Regulation is needed because drivers using phones are seriously impaired and because laws on negligent and reckless driving are not sufficient to punish offenders.

No one can deny that cell phones have caused traffic deaths and injuries. Cell phones were implicated in three fatal accidents in November 1999 alone. Early in November, two-year-old Morgan Pena was killed by a driver distracted by his cell phone. Morgan's mother, Patti Pena, reports that the driver "ran a stop sign at 45 mph, broadsided my vehicle and killed Morgan as she sat in her car seat." A week later, corrections officer Shannon Smith, who was guarding prisoners by the side of the road, was killed by a woman distracted by a phone call (Besthoff). On Thanksgiving weekend

Axelrod, Charles R.

Cooper, 2010-01-26 This textbook provides instruction in college level rhetoric and writing. It offers readings, a research manual, a handbook, and supports a range of approaches to teaching and learning including collaboration, visual rhetoric, personal writing, writing about literature, writing in the community and the workplace, field research, portfolios, oral presentations, essay exams, and ESL. It contains step by step guides to writing specific kinds of essays: remembering events, writing profiles, explaining a concept, finding common ground, arguing a position, proposing a solution, justifying an evaluation, speculating about causes, and interpreting stories. Because so much college writing requires strong argumentation skills, four of the assignment chapters focus on argumentative writing, and a separate strategies chapter covers theses, reasons, and support, counterarguments, and logical fallacies. Three full chapters on research give students useful strategies not only for conducting field, library, and Internet research, but also for evaluating sources, deciding whether to quote, paraphrase, or summarize, avoiding plagiarism, and documenting sources. The authors have included 39 readings by well known authors and various fresh voices, including 12 students, providing well written examples of the different types of essays and papers that students might be asked to complete.

**Research Writing Simplified** Raymond H. Clines, Elizabeth R. Cobb, 2010 Research Writing Simplified offers focused, sequenced practice in the skills and conventions of research writing as well as practical advice and general guidance about the writing process to help you in your courses. This handbook includes exercises to give you practice in summarizing, paraphrasing, correctly introducing and formatting direct quotations, the various options for in-text documentation, and correct format of works cited reference pages. Will answer any questions a writer has about grammar, the writing process, or research. The writing process, critical thinking, argumentative writing, style, grammar, mechanics, usage, the research process, how to document sources. Anyone who wants a reliable writing reference book.

**The Modern Writer's Handbook** Frank O'Hare, 1989      *Research Papers* William Coyle, 1995 Researching can be a daunting task, but once one learns efficient research techniques and proper format and documentation, the process becomes much easier. This book teaches both these techniques and formats. This user friendly book continues to be a leading book for teaching research techniques and current practices in research documentation. Spiral bound, the book is structured to correspond to the step by step process of writing research papers, from the initial research to the documentation of sources. Its description of library use illustrates both print and electronic sources, including more than 50 examples of proper documentation. Discussions of computer catalogs, the Internet, and CD-ROM bring readers up to date on the most recent innovations in library research techniques. While stressing the MLA style throughout, the author also discusses APA style in depth and includes a sample paper in that style. The major chapters contain exercises to reinforce the most important points, and the bibliography serves
