Station Model Lab

At commercial airports throughout the country the weather is observed, measured and recorded. In New York State alone there are over a dozen observation sites. These stations record: temperature, dew point, cloud cover, visibility, height of cloud base, amount of precipitation, wind speed and wind direction to name a few. The measurements made every hour at every station around the world. This is a very large amount of data, which can be very useful in predicting the weather.

The challenge is that a large amount of data needs to be communicated

to every weather station in the US. Because of the lack of space on weather maps, the weather information needs to be coded. In order to do this the information needs to be highly organized and standard throughout country. By using station models the data can be represented by a symbol or number, and it's meaning is easily understood by where the symbol or number is placed on the station model.

Through this lab you will learn to understand station models used in meteorology by coding and decoding a variety of stations.

Tsichritzis, Frederick H. Lochovsky, 1982 Philanthropy in Transition M.

LeClair, 2014-10-23 The already vibrant charitable sector in the US is in the midst of a transformation that is altering both the manner in which donations occur and the causes that are supported Philanthropy in Transition examines the unique role that charitable giving has played in the US from colonial times to the present The rising importance of new means of contributing

particularly giving through buying or investing is considered These new models of philanthropy have expanded the ways by which ethical consumers or investors can support a cause Although these innovations represent a revolution in the structure of philanthropy they introduce significant complexity to the act of giving donors are far removed from recipients and this may weaken the impact of contributing This transformation is also likely to accelerate the rising importance of web based promotion and fund raising as traditional nonprofits compete with social market enterprises and social impact investments for funds
