Kenya Medical Training Institution 2015 2016:

Impact of Global University Ranking Systems on Developing Countries Onyancha, Omwoyo Bosire, Tella, Adeyinka, 2023-06-01 The emotive discourses on the subject of university rankings are directly linked to the effect of such rankings on the performance of universities throughout the world. It has been observed that the top ranked universities attract major financial commitments from the industry, the best students, quality researchers, and a wide range of other quality endowments such as equipment, libraries, and laboratories. It is not surprising that the ranking of universities has gained popularity and become a significant factor shaping not only the reputation of universities but also the performance of said institutions around the world, including the developing countries. *Impact of Global University Ranking Systems on Developing Countries* presents a collection of perspectives from scholars and other stakeholders on the impact of the global ranking systems on developing countries. The book is an additional resource for discussion and discourse as far as the global university ranking systems are concerned and opens new frontiers for further research. Covering key topics such as assessment, ethics, and academic freedom, this premier reference source is ideal for administrators, policymakers, researchers, scholars, academicians, practitioners, instructors, and students. *Estimates of Recurrent Expenditure of the Government of Kenya for the Year Ending ...* Kenya, 2015 *The Report: Kenya 2017*, As the largest economy in the EAC and COMESA in terms of GDP, Kenya has positioned itself as a major economic power in sub-Saharan Africa. Traditionally a largely agrarian economy, Kenya has quickly entrenched its position as a manufacturing, logistics, and technology hub in the region, and this diversification forms a solid platform from which the government can generate economic growth over the coming years. The resolution of the electoral process, improving business confidence, and strong private consumption are likely to support GDP expansion over 2018 and into 2019. In April 2018, the IMF estimated the economy would expand by 5.5% in 2018 and 6% in 2019 compared to 4.8% in 2017. *Development Estimates for the Year ...* Kenya, 2015 *Navigating Complexity in Postgraduate/Graduate Health Professions Education: Innovative Pedagogical Approaches and Assessment Strategies* Shaista S. Guraya, Nabil Zary, Preman Rajalingam, 2025-12-19 In the realm of adult learning, graduate and postgraduate education teaching and assessment strategies are usually an extension of undergraduate strategies without contextualizing the different needs of this learner community. Unlike undergraduate learners, graduate and postgraduate learners are a population of different skills and attributes carrying strong academic, professional, and social personal identities. To strengthen this relationship of personal and professional self, an adult learner goes through the functional enculturation, critical thinking, and emancipation stages. While believing in relevance to their practice, they capitalize on their prior knowledge and bring complexity to the learning context using their varied experiences and needs. Despite years of research into andragogy and interesting findings on the differences in learning, e.g., attention, working memory, executive function, etc., in an ageing adult brain, it is harder to make any claim about dramatically different teaching and learning needs of adult learners.

Additionally there is an inadequacy of research tapping into the effectiveness of collaborative flexible self directed and reflective learning and formative competency based assessment in this learner population To strengthen healthcare systems we aim to curate a research collection of articles considering teaching and assessment strategies for adult learners to create a holistic and comprehensive snapshot of the preferences and needs of adults in the context of postgraduate health professions education This article collection lead will focus on the studies exploring innovative learning and assessment strategies within the context of graduate and postgraduate health professions education This area will also include the integration of AI and competency based education to address the intricacies associated with graduate and postgraduate degrees particularly in nursing medicine allied health physiotherapy dental and interdisciplinary teams With a specific emphasis on adult learners the contributions should seek to identify effective pedagogical approaches tailored to the unique learner characteristics and challenges posed by diverse healthcare disciplines We also aim to consider the limited availability of educational collections in this domain and provide insights that will be beneficial for the potential audience including educators program developers and practitioners Manuscript submissions must focus on graduate and postgraduate health professions education and could consider such themes as for example but not limited to Investigation of the needs and preferences of adult graduate and postgraduate learners as they differ from undergraduates Novel teaching and assessment strategies for adult learners or assessment of the effectiveness of current strategies Applications of AI and other new technologies in graduate and postgraduate education Differences in effective pedagogical approaches across graduate and postgraduate education in diverse healthcare disciplines Exploration of educational strategies that align with the age related changes in neurophysiological and cognitive profiles of adults The educational strategies may include adaptive technologies cognitive training interventions or teaching and learning approaches We welcome original research systematic reviews policy and practice reviews hypothesis and theory perspectives clinical trials community case studies curriculum instruction and pedagogy data report and brief research report specific to the context of this collection We don t accept opinion and commentary manuscripts Topic Editor Nabil Zary has received research grants from Pfizer and GE Healthcare independent medical education grants with no involvement from the funders All other Topic Editors declare no conflicts of interest

Kenya. Ethics and Anti-Corruption Commission,2016 *Access to Education and Health among Minority and Indigenous Communities in Kenya: Assessment of Baringo, Trans-Nzoia, Elgeyo Marakwet and Turkana Counties* Geoffrey Kerosi,Samuel Olando,2021-05-06 This study seeks to measure disparity in the enjoyment of health and education rights in Kenya with a focus on minorities and indigenous peoples in Turkana Elgeyo Marakwet Trans Nzoia and Baringo counties It combines primary research with an analysis of Kenyan legislation policies and regulations alongside international standards that promote the rights to health and education In particular it examines Kenya s system of raising revenues especially through

taxation and whether resources allocated towards the health and education sector benefit the country's most marginalized communities. While recognizing some improvements in recent years, Access to Education and Health among Minority and Indigenous Communities in Kenya, Assessment of Baringo, Trans Nzoia, Elgeyo Marakwet and Turkana Counties also highlights the continued challenges that constrain equitable and inclusive provision for marginalized groups in many parts of the country. From underspending to infrastructure gaps, lack of trained personnel to limited engagement with civil society, it identifies a range of problems and concluded with a series of recommendations for local authorities and the national government to improve minority and indigenous access to these basic rights.

Psychological Intervention for Suicidal Ideation, Behavior, and Attempted Suicide Tushar Singh, Sayo Hamatani, Kazuki Matsumoto, 2024-10-24. Taking one's own life is called suicide and approximately 800,000 people worldwide commit suicide every year because of various reasons according to the World Health Organization. Poor mental health is a major driver of suicide, especially in high-income countries. People who commit suicide perform impulsive destructive behaviors beyond their ability to cope with their stressors. Currently, there is a need to establish effective psychotherapies for the same. Suicidal ideation and behavior are involved in attempted suicide, and psychotherapies that specifically intervene in suicidal ideation may reduce suicidal risk. In this special issue, we would like to collect knowledge regarding psychotherapies, cognitive behavioral models wherein the evidence of their effectiveness has been generated by research and clinical trials. We expect the papers collected in this special issue to be a source of good ideas and solutions.
