Higher Education as a Tool for Progress in South Africa D. D. Tewari, 2024-10-08 Education is a tool used to elevate citizens from poverty and unemployment and thus contributes to nation building and the promotion of a knowledge based society in the information age South Africa can take a cue from Asia and its rapid industrialization in the 1970s and its subsequent progressive education The book is an illustrious historical and lucid discussion and commentary on the changing nature of education in the South African Higher education sector in particular It covers a canvass of issues on higher education and the knowledge industry in the South African context and possible challenges that lie ahead The twin challenges of low enrollment and high dropout rates in South African universities especially at first year level are alarming and robbing the country of its economic potential It is the need of the hour to collaborate on an international level to spur knowledge creation and economic growth which South Africa so desperately needs The book is a welcome addition for policy makers and research scholars in higher education **Paper Trade Journal**, 1913

When Political Transitions Work Fanie du Toit, 2018-07-26 The peaceful end of apartheid in South Africa was a monumental event in late twentieth century history A racist regime built upon a foundation of colonialist exploitation South Africa had become by that point a tinderbox suffused with day to day violence and political extremism on all sides Yet two decades later it was a stable democracy with a growing economy How did such a deeply divided conflicted society manage this remarkable transition In *When Political Transitions Work* Fanie du Toit who has been a participant and close observer in post conflict developments throughout Africa for decades offers a new theory for why South Africa's reconciliation worked and why its lessons remain relevant for other nations emerging from civil conflicts He uses reconciliation as a framework for political transition and seeks to answer three key questions how do the reconciliation processes begin how can political transitions result in inclusive and fair institutional change and to what extent does reconciliation change the way a society functions Looking at South Africa one of reconciliation's most celebrated cases Du Toit shows that the key ingredient to

successful reconciliations is acknowledging the centrality of relationships He further develops his own theoretical approach to reconciliation as interdependence the idea that reconciliation is the result of an integrated process of courageous leadership fair and inclusive institutions and social change built toward a mutual goal of prosperity As Du Toit conveys the motivation for reconciliation is the long term well being of one s own community as well as that of enemy groups Without ensuring the conditions in which one s enemy can flourish one s own community is unlikely to prosper sustainably South African national bibliography ,1999 Classified list with author and title index
