Fig. 1- Front suspension components

GENERAL INFORMATION

The front suspension, a McPherson strut type, incorporates many features designed to ensure good ride characteristics, combined with a high level of steering response and directional stability.

The suspension consists of two vertically mounted McPherson strut units, a single crossmember, a lower control arm and a stabilizer bar.

Each suspension unit consists of a strut assembly, coil spring, a hub and knuckle assembly and a lower control arm and is mounted to the lower control arm at the top and at two points, on the crossmember at the bottom. Each unit carries a lower control arm, a lower control arm bearing and the lower ball joint.

Each strut assembly houses a double acting hydraulic damper, which dampens a long tube in both the upward stroke of the strut. The compression stroke is controlled by the spring and limited by a bump rubber float near the piston rod.

The coil spring is a macramé spring and is used to give good ride and handling characteristics for all load carrying requirements.

The knuckle, which is mounted between the lower end of the strut and the lower arm, houses the lower wheel bearing and supports the hub and disc assembly.

The lower arm, which incorporates the lower ball joint, pivots on rubber bushes at two points on the crossmember.

The crossmember, which also houses the steering gearbox, is attached to the body at six points through rubber bushings and is braced longitudinally to the chassis by detachable members which are also secured on rubber bushes at body anchoring points.

The stabilizer bar, which is fixed to reduce any vehicle body roll inclination when cornering, is mounted to the crossmember and lower control arm by pillow ball, ball joints.

WHEEL ALIGNMENT

Inspection and adjustment

The wheel alignment should be checked with the vehicle positioned on a level surface and with the front wheels in the straight ahead position. Prior to performing any adjustment ensure that all four suspension and steering components are in a serviceable condition and that the wheels and tyres are free of defects and correctly inflated.
