Long Exposure Manual:

Mastering Long Exposure A. Zacharias, 2018 Whether you're taking photographs in the dead of night or looking to create an ethereal effect with water or clouds during the day long exposures are among the most challenging areas of photography. Very often there are physical obstacles to overcome whether it's being unable to see to frame your shot or focus, an inability to predict movement during the exposure, or simply the need to hold your camera steady while the shutter is open. There are also numerous technical issues to resolve such as striking a balance between ISO and noise, dealing with high dynamic range, and maintaining the best possible image quality when the laws of physics are working against you. Yet just as the demands placed upon the photographer are exceptional, so too are the images that can be created when you push your camera to its limits. Packed with stunning photography throughout, the author's expert advice, tips, and tricks are augmented by Masterclasses from some of the world's leading long exposure champions, each sharing the secrets of their success. So whether you want to master star trail photography, shoot cityscapes at dusk, paint with light, or use blur creatively, this is the only book you'll need.
