Finin,Steven Willmott,2006-03-30 There is a growing interest in the use of ontologies for multi agent system applications On the one hand the agent paradigm is successfully employed in those applications where autonomous loosely coupled heterogeneous and distributed systems need to interoperate in order to achieve a common goal On the other hand ontologies have established themselves as a powerful tool to enable knowledge sharing and a growing number of applications have benefited from the use of ontologies as a means to achieve semantic interoperability among heterogeneous distributed systems In principle ontologies and agents are a match made in heaven that has failed to happen What makes a simple piece of software an agent is its ability to communicate in a social environment to make autonomous decisions and to be proactive on behalf of its user Communication ultimately depends on understanding the goals preferences and constraints posed by the user Autonomy is the ability to perform a task with little or no user intervention while proactiveness involves acting autonomously with no need for user prompting Communication but also autonomy and proactiveness depend on knowledge The ability to communicate depends on understanding the syntax terms and structure and the semantics of a language Ontologies provide the terms used to describe a domain and the semantics associated with them In addition ontologies are often complemented by some logical rules that constrain the meaning assigned to the terms These constraints are represented by inference rules that can be used by agents to perform the reasoning on which autonomy and proactiveness are based *ACEEE's Green Book* John DeCicco,John M DeCicco, Ph.D.,James Kliesch,James Kliesch, B.S., M.S.,2002-02 4x4s, Pickups and Vans Consumer Guide,2002-04 An invaluable resource for shoppers in the fastest growing segment of the new vehicle market this reference provides information on the best buys up to date prices hands on reviews and shopping tips and features profiles on more than 60 new sport utility vehicles **Sierra 1990 to 2000, Vitara 1988 to 1998** ,2010 **The National Highway Traffic Safety Administration's Rating System for Rollover Resistance** National Research Council (U.S.).
