**Through the Shadowlands** Julie Rehmeyer, 2017-05-23 Julie Rehmeyer felt like she was going to the desert to die Julie fully expected to be breathing at the end of the trip but driving into Death Valley felt like giving up surrendering She d spent years battling a mysterious illness so extreme that she often couldn t turn over in her bed The top specialists in the world were powerless to help and research on her disease chronic fatigue syndrome was at a near standstill Having exhausted the plausible ideas Julie turned to an implausible one Going against both her instincts and her training as a science journalist and mathematician she followed the advice of strangers she d met on the Internet Their theory that mold in her home and possessions was making her sick struck her as wacky pseudoscience But they had recovered from chronic fatigue syndrome as severe as hers To test the theory that toxic mold was making her sick Julie drove into the desert alone leaving behind everything she owned She wasn t even certain she was well enough to take care of herself once she was there She felt stripped not only of the life she d known but any future she could imagine With only her scientific savvy investigative journalism skills and dog Frances to rely on Julie carved out her own path to wellness and uncovered how shocking scientific neglect and misconduct had forced her and millions of others to go it alone In stunning prose she describes how her illness transformed her understanding of science medicine and spirituality Through the Shadowlands brings scientific authority to a misunderstood disease and spins an incredible and compelling story of tenacity resourcefulness acceptance and love

**Sick and Tired** Emily K. Abel, 2021-03-19 Medicine finally has discovered fatigue Recent articles about various diseases conclude that fatigue has been underrecognized underdiagnosed and undertreated Scholars in the social sciences and humanities have also ignored the phenomenon As a result we know little about what it means to live with this condition especially given its diverse symptoms and causes Emily K Abel offers the first history of fatigue one that is scrupulously researched but also informed by her own experiences as a cancer survivor Abel reveals how the limits of medicine and the American cultural emphasis on productivity intersect to stigmatize those with fatigue Without an agreed upon approach to confirm the problem through medical diagnosis it is difficult to convince others that it is real When fatigue limits our ability to work our society sees us as burdens or worse With her engaging and informative style Abel gives us a synthetic history of fatigue and elucidates how it has been ignored or misunderstood not only by medical professionals but also by American society as a whole

**Invisible Illness** Emily Mendenhall, 2026-01-06 A moving cultural history of disability and a powerful call to action to change how our medical system and society supports those with complex chronic conditions From lupus to Lyme invisible illness is often dismissed by everyone but the sufferers Why does the medical establishment continually insist that when symptoms are hard to explain they are probably just in your head Inspired by her work with long COVID patients medical anthropologist Emily Mendenhall traces the story of complex chronic conditions to show why both research and practice fail so many Mendenhall points out disconnects between the reality of chronic disease

which typically involves multiple intersecting problems resulting in unique individualized illness and the assumptions of medical providers who behave as though chronic diseases have uniform effects for everyone And while invisible illnesses have historically been associated with white middle class women being believed that you are sick is even more difficult for patients whose social identities and lived experiences may not align with dominant medical thought Weaving together cultural history with intimate interviews Invisible Illness upholds the experiences of those living with complex illness to expose the failures of the American healthcare system and how we can do better American Family Physician ,2009
