

O Level Principles of Accounts (7110)

Unit 5: Financial Statements – Sole Trader

Recommended Prior Knowledge

Students should have a thorough understanding of Units 1 to 4 before embarking on a study of this unit.

Context

Financial statements combine the knowledge gained in Units 1 and 4 and a test of this topic conventionally acts as a summary assessment of knowledge acquired earlier. Financial statements are used in examinations and in practice to highlight organisational performance and position.

Outline

This unit concentrates on financial statements which measure performance in terms of gross and net profit and position (what an organisation owns, owes and what is owed to it).

AO	Learning outcomes	Suggested Teaching activities	Learning resources
3.1	Candidates should be able to: calculate the gross and net profits or losses, based on accounting principles, for a specified period	Recapitulate on the matching concept and how it affects the: - Trading account section of the income statement - Profit and loss account section of the income statement Explain the differences between the two and what each cover. When looking at the role of closing inventory, consider introducing the concept of cost or net realisable value. It is helpful to students to show them how the information from the ledgers is transferred by 'closing', for example, the sales and purchases accounts and taking the balances to the income statement. A progressive approach assists students in their understanding, for example: - gross profit = sales less cost of sales (opening stock + purchases – closing stock) - including sales returns and purchase returns	http://www.staffs.ac.uk/schools/business/badmin/staff/52/accsys/when.html Past question papers available from CIE, e.g. Nov 2003 Paper 1 Q27 Specimen Paper 1 Q16.22
