Pane,2023

This report evaluates the effects of Lexia Core5 Reading Core5 a product of Lexia Learning Systems on the reading achievement of students in grades 3 5 during the 2021 2022 academic year Core5 is a program that focuses on various student literacy skills such as fluency vocabulary and comprehension This report represents the first study in a broader effort to develop independent and rigorous research evidence about the effects of Core5 on student achievement The authors compared the performance of students in a school district that used Core5 with similar students in similar schools across the United States that did not use Core5 The analyses estimated that students who used Core5 experienced larger reading achievement gains on average than their counterparts in the matched comparison group Differences in outcomes measured in this study are likely to have been caused by Core5 use but the methods used cannot unambiguously rule out selection bias to establish that causality Moreover study results might not generalize to all grades in which Core5 is offered or to all U S schools *Managing the New Tools in K-12 Teaching and Learning* Jerome A. Schulz,2018-02-02

Managing the New Tools in K 12 Teaching and Learning How Technology Can Enable School Improvement is about how to manage technology for learning at the district and school levels It provides an overview of the components of learning technology these include student devices networking software productivity toolkits electronic curricula and resources and data system infrastructure And it discusses how we can manage our technology efforts more effectively to help our students attain the benefits of this technology The book concludes with case studies of how this is being done at pioneering districts We are now at a tipping point in implementing learning technology on a larger scale This is happening very quickly Historically learning technology was driven by a strategy of technology integration where we called on individual teachers to each determine how to use technology in their classes and make changes in their own ways of working But to successfully implement technology on the scale we need requires top down as well as bottom up efforts *Managing the New Tools in K 12 Teaching and Learning* focuses on how districts and schools can now use technology to bring about the big improvements in learning we are all striving for **End-User Considerations in Educational Technology Design** Roscoe, Rod D.,Craig, Scotty D.,Douglas, Ian,2017-06-16
