for the guidance of teachers**

0450 BUSINESS STUDIES

0450/13

Paper 1 (Short Answer/Structured Response),
maximum raw mark 100

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes must be read in conjunction with the question papers and the report on the examination.

- Cambridge will not enter into discussions or correspondence in connection with these mark schemes.

Cambridge is publishing the mark schemes for the May/June 2012 question papers for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level syllabuses and some Ordinary Level syllabuses.

Stadium City Helen Morgan Parmett, 2025-09-23 A new sports stadium has an outsized impact on a city's landscape and image of itself. Each stadium also plays a central role in media institutions, technologies, and culture as a catalyst for urban change and a flashy neighborhood anchor, cornerstone of regional identity, and purveyor of multimedia experiences. Helen Morgan Parmett analyzes sports stadiums in Atlanta, Seattle, and Minneapolis to demonstrate the role that media institutions, technologies, and culture play in sports and examine their impact on the urban landscape. These interconnected factors impact struggles over city space, identity, and urban governing. As Morgan Parmett shows, stadiums exist as more than just buildings and sporting places; they are central nodes in the city that connect, disconnect, and distribute resources, people, information, and ultimately power. Morgan Parmett demonstrates how the sportification of place is influenced by the specific histories, geography, and sporting cultures of a city while explaining their relationship to broader forces at work in media, sport, and urbanism. Original and incisive, *Stadium City* offers a beyond-the-playing-field analysis of sports stadiums and their impact on our cities and our lives.

Rehabilitation Robotics: Challenges in Design, Control, and Real Applications Francisco Romero Sánchez, Luciano Luporini Menegaldo, Josep M. Font-Llagunes, Massimo Sartori, 2022-08-31. **Documenting Aftermath** Megan Finn, 2018-10-30. An examination of how changing public information infrastructures shaped people's experience of earthquakes in Northern California in 1868, 1906, and 1989. When an earthquake happens in California today, residents may look to the United States Geological Survey for online maps that show the quake's epicenter, turn to Twitter for government bulletins, and the latest news; check Facebook for updates from friends and family, and count on help from the Federal Emergency Management Agency (FEMA). One hundred and fifty years ago, however, FEMA and other government agencies did not exist, and information came by telegraph and newspaper. In *Documenting Aftermath*, Megan Finn explores changing public information infrastructures and how they shaped people's experience of disaster, examining postearthquake information and communication practices in three Northern California earthquakes: the 1868 Hayward Fault earthquake, the 1906 San Francisco earthquake and fire, and the 1989 Loma Prieta earthquake. She then analyzes the institutions, policies, and technologies that shape today's postdisaster information landscape. Finn argues that information orders complex constellations of institutions, technologies, and practices influence how we act in experience and document events. What Finn terms event epistemologies constituted both by historical documents and by researchers who study them, explain how information orders facilitate particular possibilities for knowledge. After the 1868 earthquake, the Chamber of Commerce telegraphed reassurances to out-of-state investors while local newspapers ran sensational earthquake narratives. In 1906, families and institutions used innovative techniques for locating people, and in 1989, government institutions and the media developed a symbiotic relationship in information dissemination. Today, government disaster response plans and new media platforms imagine different sources of informational authority yet work together shaping disaster narratives. **Mathematical Reviews**, 2006. **Book Review Index**, 2006.
