

Rack 2: Roasting small cuts of meat, pies, loaves of bread, bundt cakes, and 2-rack baking.

**NOTE:** For best performance, place bakeware from front to back.

Rack 1: Roasting large cuts of meat and poultry.

### Multiple Rack Cooking

2-rack: Use rack positions 2 and 4.

### Baking Layer Cakes on 2 Racks

For best results when baking cakes on 2 racks use racks 2 and 4 for baking. Place the cakes on the racks as shown.

A. Control panel  
B. Oven vent  
C. Oven door

### Oven Vent

The oven vent releases hot air and moisture from the oven, and should not be blocked or covered. Blocking or covering the vent will cause poor air circulation, affecting cooking and cleaning results. Do not set plastics, paper or other items that could melt or burn near the oven vent.

### Baking and Roasting

The bake element or burner will glow red when cycling on; the broil element or burner will not. This feature is automatically activated when the oven is in use.

Before baking and roasting, position racks according to "Positioning Racks and Bakeware" section. When roasting, it is not necessary to wait for the oven preheat cycle to end before putting food in unless it is recommended in the recipe.

#### Preheating

After START is pressed, the oven will begin preheating. Once 100°F (38°C) is reached, the display temperature will increase as the actual temperature of the oven increases. When the preheat temperature is reached, a tone will sound, and the selected temperature will appear on the display.

### Broiling

Broiling uses direct radiant heat to cook food. Changing the temperature when broiling allows more precise control when cooking. The lower the temperature, the slower the cooking. Thicker cuts and unevenly shaped pieces of meat, fish and poultry may cook better at lower broiling temperatures.

For best results, use a broiler pan and grid. It is designed to drain juices and help avoid spatter and smoke.

If you would like to purchase a broiler pan, one may be ordered. Please refer to the cover for contact information. Ask for Part Number 12500100.

It is not necessary to preheat the oven before putting food in unless recommended in the recipe. Position food on grid in a broiler pan, then place it in the center of the oven rack. Close the door to the broil stop position to ensure proper broiling temperature.

### Timed Cooking (on some models)

#### ⚠ WARNING

##### Food Poisoning Hazard

Do not let food sit in oven more than one hour before or after cooking.

Doing so can result in food poisoning or sickness.
