Recognition Systems CORES 05 May 22 25 2005 Rydzyna Castle Poland This conference is a continuation of a series of con
ferences on similar topics KOSYR organized each second year since 1999 by the Chair of Systems and Computer Networks
Wroclaw University of Technology An increasing interest to those conferences paid not only by home but also by foreign
participants inspired the organizers to transform them into conferences of international range Our expectations that the
community of specialists in computer recognizing systems will find CORES 05 a proper form of maintaining the tradition of
the former conferences have been confirmed by a large number of submitted papers Alas organizational constraints caused a
necessity to narrow the acceptance criteria so that only 100 papers have been finally included into the conference program
The area covered by accepted papers is still very large and it shows how vivacious is scientific activity in the domain of
computer recognition methods and systems It contains various theoretical approaches to the recognition problem based on
mathematical statistics fuzzy sets morphological methods wavelets syntactic methods genetic algorithms artificial neural
networks ontological models etc Most attention is still paid to visual objects recognition however acoustic textual and other
objects are also considered Among application areas medical problems are in majority recognition of faces speech signals
and textual information processing methods being also investigated *Texture Analysis for Magnetic Resonance Imaging*
