The Sustainable City IX N. Marchettini, C.A. Brebbia, R. Pulselli, S. Bastianoni, 2014-09-23 Containing the proceedings of the 9th International Conference on Urban Regeneration and Sustainability this book addresses the multi disciplinary aspects of urban planning a result of the increasing size of cities the amount of resources and services required and the complexity of modern society Most of earth s population now lives in cities and the process of urbanisation still continues generating many problems deriving from the drift of the population towards them These problems can be resolved by cities becoming efficient habitats saving resources in a way that improves the quality and standard of living The process however faces a number of major challenges related to reducing pollution improving main transportation and infrastructure systems New urban solutions are required to optimise the use of space and energy resources leading to improvements in the environment i e reduction in air water and soil pollution as well as efficient ways to deal with waste generation These challenges contribute to the development of social and economic imbalances and require the development of new solutions Large cities are probably the most complex mechanisms to manage However despite such complexity they represent a fertile ground for architects engineers city planners social and political scientists and other professionals able to conceive new ideas and time them according to technological advances and human requirements The challenge of planning sustainable cities lies in considering their dynamics the exchange of energy and matter and the function and maintenance of ordered structures directly or indirectly supplied and maintained by natural systems Topics covered include Urban strategies Planning development and management Urban conservation and regeneration The community and the city Eco town planning Landscape planning and design Environmental management Sustainable energy and the city Transportation Quality of life

Waterfront development Case studies Architectural issues Cultural heritage issues Intelligent environment and emerging technologies Planning for risk Disaster and emergency response Safety and security Waste management Infrastructure and society Urban metabolism The Promise of Planning Philip Harrison, Alison Todes, 2024-07-10 The Promise of Planning explores the experience of planning internationally since the global financial crisis focusing on South Africa The book is a response to a decade plus in which state led planning has re emerged as a putative means for achieving developmental goals as indicated in global initiatives such as the New Urban Agenda and where planning in South Africa has consolidated in terms of its legal and policy basis However the return of planning is happening in an inauspicious context with economic fragilities technological shifts political populism institutional complexities and more threatening to upturn the new promise of planning The book provides a careful analytical account of planning in South Africa and how and why its promises have been difficult to achieve Building on the authors previous book Planning and Transformation the book sheds light on planning as an increasingly complex and diverse governmental practice within a perpetually changing world It can be used as a resource for planners who must make good on the new promise of planning while navigating the risks and threats of the contemporary world as well as students and faculty interested in international planning debates and the South African case **Small Town Tourism in South Africa** Ronnie Donaldson, 2017-10-14 This book investigates small town tourism development in South Africa taking into account the most common strategies branding promotion festivals and theming The contents of the book resonate with the intersection of the power elite and their impacts on small town tourism Because the book focuses on small town geographies in South Africa the literature on small town tourism in the country is reviewed in Chapter 2 to provide a contextual background Each subsequent chapter begins with an overview of international literature to give the conceptual context of the case studies each chapter explores In Chapter 3 the concept of small town tourism branding is illustrated by an exploration of the Richmond book town In Chapter 4 the branding theme is probed further in an investigation of two winners of the Kw la Town of the Year competition namely Fouriesburg and De Rust Chapter 5 documents the branding of Sedgefield through its proclamation as Africa s first Cittaslow slow town a process driven by the local power elite to the exclusion of town s poor who have no understanding of the intentions of the Cittaslow movement and its potential benefits for the town Chapter 6 is a case study of Greyton s tourism led rural gentrification by which a small town has transformed in three decades to become a sought after place of residence for elite immigrants so making the town a jewel tourism destination while reinforcing racial segregation Because festivals and events creations of the wealthy have made significant financial contributions to small towns Chapter 7 considers festivals and events as strategies to market and brand small towns in a particular way Case studies of the economic impacts of festivals on small towns are assessed and the assessment methodologies used are critiqued Chapter 8 provides a synthesis by drawing on the thesis of the urban growth machine by power elites **Global Foodscapes** Alistair Fraser, 2016-07-22 What we eat as well as how it is produced

processed moved sold and used by our bodies seems to matter like never before Global Foodscapes takes on this topicality and asks readers to think about how we are all involved in the making of an odd and in many ways troubling and contested food economy It explores how food is conceived traded grown reared processed sold and consumed investigates what goes wrong along the way and assesses what diverse people around the world are doing to fix these faults The text uses a carefully crafted framework that explores the interaction of five forms of oppression and five means of resistance as they are worked out over five stages in the food economy It draws on case studies from around the world that illuminate key issues about food in today's world examines how oppression affects diverse people caught up in the food economy and highlights how individuals groups and institutions such as governments but also firms are trying to improve how we interact with the food system Global Foodscapes is a highly accessible and useful text for undergraduate students interested in the global food economy The global range of case studies examples and reference points as well as its original framework allows the text to speak to diverse audiences and generate debate about whether anything and if so what needs to be done about the food system we depend upon so heavily Additional materials such as suggested readings and discussion points help students consider the issues at hand and conduct initial and more detailed research on today's food economy

Post-Development from the Global South Sally Matthews, Alba Castellsagué, 2025-04-22 Post development advocates and decolonial thinkers are calling for radical alternatives to development but how do these ideals sit with the day to day reality of marginalised communities struggling with poverty precarity and the deprivation of human rights This book investigates how post development alternatives are being understood and negotiated on the ground in the Global South Indigenous concepts and practices attributed to people in the Global South are seen by post development thinkers as offering transformative alternatives to dominant development models of progress and economic growth For example buen vivir from particular regions of South America points to a culture of life and ubuntu in Southern Africa emphasises human connectedness and mutuality Such terms are associated with social and environmental sustainability and a greater connection to Southern epistemologies Drawing on extensive fieldwork this book takes us directly to Global South communities from around the world to consider the complex ways in which they negotiate the ideas and practices associated with post development and their views on the supposed indigenous alternatives The book encourages a contextual approach that embraces the tensions and contradictions that exist within different communities Taking the reader from abstract post development theory right into the heart of communities directly impacted by development this book will be an important guide for students researchers and practitioners looking for better ways to address the desires and aspirations of marginalised communities in the Global South

Corporate Social Responsibility in Sub-Saharan Africa Stephen Vertigans, Samuel O. Idowu, René Schmidpeter, 2015-12-21 This book provides a comprehensive overview of corporate social responsibility and its development in Africa It provides in depth studies on 11 sub Saharan countries demonstrating that corporate social responsibility is

forming and going through different stages of metamorphosis in the continent Though corporate and individual attitudes towards sustainability in Africa still leave a lot to be desired this book showcases how things are rapidly changing for the better in this regard It demonstrates and provides evidence for the fact that corporate social responsibility contributes significantly to the way sub Saharan African economies are being transformed with service sectors expanding commercial activities diversifying and industrial bases growing through the initiatives of small medium and large organizations and innovators supported by widespread higher education program rollouts The book highlights how progressive and wide ranging CSR approaches have emerged and how much they differ from the obsolete approaches of the past which promulgated negative stereotypes marginalized communities and positioned them as victims or beneficiaries of development
