Brown,Brendan M. Connolly, Personal finance is not usually taught in school which leads to learning most financial lessons by making costly mistakes in the real world Additionally most financial experts are actually salespeople in disguise whom are looking out for their commission rather than your investment While you personally do not need to be an expert having some basic knowledge on personal finance and doing some research will drastically help when making financial decisions This book will start you in the right direction Personal Finance Under One Hour does not encompass everything there is to learn about personal finance but instead is designed to give you a basic overview in only an hour Let s be honest most people do not have the time to read a 300 page book on any topic but many people can spare an hour Many sources such as books websites and personal mentors have inspired the contents of this book The goal is to sum up the best information these sources offer so you can get the most important points in the least amount of time By reading Personal Finance Under One Hour you will gain the necessary knowledge to expand your financial IQ and make better financial decisions Under One Hour books are broken down into six 10 minute sections making it easier to read and learn on the go Each section contains two or three main topics with sub topics to explore Bold words or phrases are the highlight of the topic or paragraph while italicized words are ideas to be explored further outside of the book **Digital Interactive TV and Metadata** Arthur

Lugmayr,Samuli Niiranen,Seppo Kalli,2013-03-09 Recent years have brought many changes to the world of mass media The Internet and mobile communications technology have provided consumers with interactive digital services Television is catching up with this trend through the digitalization process Digital television is a hybrid platform combining elements from classical analog television and the Internet providing modern multimedia services on a familiar platform In short digital TV is a gateway to the world of interactive digital media Digital TV brings consumers into the television service arena and offers them new degrees of freedom However as the service and multimedia content types diversify and the services and their content increase television is facing many of the same challenges of complexity and information overflow faced by other digital media Metadata can handle the diverse services and content of digital TV efficiently and in a consumer friendly way Metadata means that the data are accompanied by other data which describe them As data about data meta data can provide an insight into syntactically and semantically complex data by distilling their essence to a set of simple descriptors Metadata also helps to structure and manage information in diverse settings The use of metadata in broadcast multimedia should not be restricted to being merely a tool for coping with the challenges of a complex networked multimedia environment Instead metadata offers new opportunities for the development of innovative services The Complete Small Truck Cost Guide,
