## IMPORTANT

- Install the register in a location not subject to direct sunlight, unusual temperature changes, high humidity or splashing water.
- Installation in such locations could cause damage to the cabinet and the electronic components.
- Never install the register in saline areas (e.g., close to the sea).
- Installing the register in such locations could cause component failure with the corrosion.
- Never operate the register with wet hands.
- The water could seep into the interior of the register and cause component failure.
- When cleaning the register, use a dry, soft cloth. Never use solvents, such as benzene and/or thinner.
- The use of such chemicals will lead to discoloration or deterioration of the cabinet.
- The register plugs into any standard wall outlet (official (nominal) voltage).
- Other electrical devices on the same electrical circuit could cause the register to malfunction.
- If the register malfunctions, call your authorized SHARP dealer for service - do not try to repair the register yourself.
- For complete electrical disconnection, disconnect the main plug.
- To prevent the register from moving when the drawer opens, the fixing angle bracket is supplied with the register. If you want to install the bracket, consult your authorized SHARP dealer.
- In order to operate the register properly, you must initialize it before operating for the first time. To initialize the register, consult your authorized SHARP dealer.

## PRECAUTION

This register has a built-in memory protection circuit which is operated by a rechargeable battery pack. It should be known that all batteries will, in time, dissipate their charge even if not used. Therefore to insure an adequate initial charge in the protection circuit and to prevent any possible loss of memory upon installation, it is recommended that each unit be allowed to be recharged for a period of 24 to 48 hours prior to use by the customer.

In order to charge the battery pack, the machine must be plugged in. This recharging precaution can prevent unnecessary initial service calls. The battery pack is a consumable part, and its operating time will get shorter gradually each time it is recharged for memory backup.

When the battery pack cannot be charged enough to perform memory backup, it means that the service life of the battery pack has expired.

If this is the case, contact your authorized SHARP dealer.

### Caution Scanner connection

In order to allow a plug & play connection of the optional scanner the Pin 5 of the D-Sub connector 1 (Scanner 1) uses +5V. Be very careful of this +5V in case connection of a different device should be done so that a damage of the register or device is avoided.
