The International Antarctic Weather Forecasting Handbook John Turner, Stephen Pendlebury, 2004 Presents an overview of the meteorology and climatology of the Antarctic aimed at the forecaster who are new to working on the continent Many forecasters who arrive at Antarctic research stations have no previous experience of forecasting on the continent and many come from the Northern Hemisphere so making it even more difficult for them to adjust to the analysis and forecasting tasks that they will have to carry out Although the majority of the forecasters will have had some training in Antarctic forecasting methods prior to travelling South this section of the handbook should be a useful introduction to the meteorological conditions experienced across the continent In addition in Appendix 4 there is a suggested training programme for Antarctic weather forecasters that presents a more structured introduction to analysis and prediction techniques for those who are required to prepare training modules
