OECD Guidelines for the Testing of Chemicals, Section 4 Test No. 458: Stably Transfected Human Androgen Receptor Transcriptional Activation Assay for Detection of Androgenic Agonist and Antagonist Activity of Chemicals OECD,2023-07-04

This Test Guideline describes in vitro assays which use Androgen Receptor TransActivation ARTA to detect Androgen Receptor Agonists and Antagonists The ARTA assay methods are mechanistically and functionally similar test methods that provide information on the transcription and translation of a reporter gene following the binding of a chemical to the androgen receptor and subsequent transactivation *The Role of the Antibody-dependent Cell-mediated Cytotoxicity Mechanism in the Murine P815 Mastocytoma Tumor System* LeRoy Louis Kondo,1979

The complexity of the structure and function of many biotechnology derived products necessitates a wide range of analytical procedures to adequately characterize the product Physicochemical techniques provide little if any information regarding the potency of biologicals Therefore the development and analysis of biological assays that measure the ability of a material to elicit a function are essential to successful product development Bioassays such as in vivo or cell based assays often exhibit inherent variability due to the use of living materials It is necessary to design and execute bioassays to reduce variability as much as possible whilst enabling statistically valid measures of the reproducibility of potency estimates The manuscripts in this volume aim to describe statistical approaches currently being used in the design and analysis of potency assays for biotechnology products and to identify factors influencing the appropriate choice of these approaches Issues that impact on assay design implementation validation and interpretation are discussed both from the analysts and statisticians perspective Cost-effective Approach for Chlamydia Prevention and Control in a Managed Care Setting Hiroshi Takahashi,2000 **Genetic Engineering & Biotechnology News** ,2008
