La Logistique Ses Meacutetiers Ses Enjeux Son Avenir:

La logistique Frank Guérin, Daniel Brun, 2014-11-25 La logistique recouvre un ensemble d'activités et de métiers très large des niveaux de responsabilités multiples. Les profils requis sont très divers et peuvent constituer une orientation professionnellement intéressante et intellectuellement stimulante. Pour autant nous constatons qu'elle est aujourd'hui une discipline encore largement méconnue du grand public et qui souffre d'a priori nombreux. Vision souvent triquée d'un spectre d'activités pourtant très large. C'est le paradoxe logistique à l'occasion des 20 ans de l'Institut Supérieur d'études Logistiques ISEL école d'ingénieurs de l'Université du Havre. Daniel Brun et Frank Guérin ont coordonné un ouvrage qui cherche à promouvoir cette discipline en exposant ses multiples réalités. L'idée générale est de croiser les regards d'acteurs différents qu'ils soient académiques responsables en entreprises et même politiques afin d'avoir une représentation clectique plus claire et plus juste de la logistique. Seules l'accumulation et la confrontation d'analyses d'experts d'horizons différents peuvent donner au nonophyte une vision représentative d'une discipline qui se veut globale et transversale. Regards universitaires et témoignages de responsables logistiques de grandes organisations internationales permettent ainsi au lecteur de se forger peu à peu une opinion instruite et concrète. Ce livre n'est donc ni un manuel ni un recueil d'articles de recherches mais un parcours la rencontre d'une discipline de ses défis de ses acteurs de ses métiers et bien sûr de son avenir qui semble prometteur. La construction des nouveaux modèles économiques dits durables place en effet les logisticiens au cœur des grandes manœuvres stratégiques et opérationnelles de demain.

Supply Chain Management Aïcha Aguezoul, 2023-11-29 L'externalisation logistique ne va pas sans un recours aux prestataires de services logistiques PSL acteurs incontournables dans la régulation des flux au sein de toute Supply Chain. Cette décision stratégique permet au chargeur de se recentrer sur son cœur de métier. Supply Chain Management présente une synthèse des travaux menés sur la sélection des PSL processus qui relève du construit Supply Chain Management SCM et qui décrit les principaux critères leur importance relative au cours des dernières années et les outils d'aide à la décision de cette sélection.
