**The Cambridge Handbook of Consumer Privacy** Evan Selinger, Jules Polonetsky, Omer Tene, 2018-04-02 Businesses are rushing to collect personal data to fuel surging demand Data enthusiasts claim personal information that's obtained from the commercial

internet including mobile platforms social networks cloud computing and connected devices will unlock path breaking innovation including advanced data security By contrast regulators and activists contend that corporate data practices too often disempower consumers by creating privacy harms and related problems As the Internet of Things matures and facial recognition predictive analytics big data and wearable tracking grow in power scale and scope a controversial ecosystem will exacerbate the acrimony over commercial data capture and analysis The only productive way forward is to get a grip on the key problems right now and change the conversation That s exactly what Jules Polonetsky Omer Tene and Evan Selinger do They bring together diverse views from leading academics business leaders and policymakers to discuss the opportunities and challenges of the new data economy     Wealth and Poverty in Close Personal Relationships Susan Millns, Simone Wong, 2017-07-14 At a time of global and domestic economic crisis the financial aspects of domestic and familial relationships are more important and more strained than ever before The focus of this book is on the distribution of wealth and poverty in traditional and non traditional familial relationships The volume takes an interdisciplinary approach to explore the way in which money matters are structured and governed within close personal relationships and the extent to which they have an impact on the nature and economic dynamics of relationships As such the key areas of investigation are the extent to which participation in the labour market unpaid caregiving inheritance pensions and welfare reform have an impact on familial relationships The authors also explore governmental and legal responses by investigating the privileging of certain types of domestic relationships through fiscal and non fiscal measures and the differential provision on relationship breakdown The impact of budget and welfare cuts is also examined for their effect on equality in domestic relationships     **A**

**Contemporary Concept of Monetary Sovereignty** Claus D. Zimmermann, 2013-11-07 Monetary sovereignty is a crucial legal concept dictating that states have sovereignty over their own monetary financial and fiscal affairs However it does not feature as part of any key instruments of international law including the Articles of Agreement of the International Monetary Fund Rather it has remained a somewhat separate notion developed under contemporary international law from an assertion of the former Permanent Court of International Justice in 1929 As a consequence of globalization and increasing financial integration and a worldwide trend towards the creation of economic and monetary unions the principle of monetary sovereignty has undergone significant change This book examines this evolution in detail and provides a conceptual framework to demonstrate what this means for the legal and economic challenges faced by the international community The book examines the historic origins and evolution of the concept of monetary sovereignty putting it into the context of broader concepts of sovereignty It argues that monetary sovereignty remains relevant as a dynamic legal concept with both positive and normative components It investigates the continuing hybridization of international monetary law resulting from changes to its formal and material sources It then examines the complex phenomenon of exchange rate misalignment under international monetary and trade law and the increasing regionalization of monetary sovereignty notably in light of the

European sovereign debt crisis Finally it assesses the role the concept of monetary sovereignty can play in the reorganization of international finance following the recent global financial crisis Microsoft Money 2000 Stephen L. prosperity for citizens around the world These challenges have changed how people work live and do business Monetary Wisdom Monetary Aspirations and Decision Making presents an excellent collection of innovative and a multi cultural view of how money has affected decision making not only at an individual level but at organizational level This book discusses the powerful motivators of money and the connection to ethical decision making both in organizations and social life Inspires readers to learn one of the world s most often used money attitude measures Notices that in modern societies money is power at the individual level Suggests that monetary aspirations not money itself predict cheating Profiles that reducing stress curbs dishonesty directly and indirectly Illustrates that leaders promote employees honesty and creativity Reveals how corruption expands prospect theory to a global level Explores the contexts to achieve balanced aspirations and serenity

The Software Encyclopedia ,1986      *Unconscious information processing in executive control* Nicola De Pisapia, The aim of this Frontiers Research Topic is to review and further explore the topic of unconscious processing in executive control Executive control refers to the ability of the human brain mostly associated with prefrontal cortex activity to regulate the processing involved in the execution of novel or complex goal directed tasks Previous studies or models of human cognition have assumed that executive control necessarily requires conscious processing of information This perspective is in line with common sense and personal introspection which suggest that our choices are intentional and based on conscious stimuli Nevertheless in the last few years several behavioural and cognitive neuroscience studies have put under scrutiny this assumption Cumulating evidence is now showing that prefrontal executive control can involve or be triggered by unconscious processing of information with consequent effects on observed behaviours One of the main methods adopted to study such unconscious mechanisms is masked priming consisting in presenting visually masked stimuli which nonetheless are shown to affect goal directed behaviour or influence constructs linked to executive control and prefrontal cortex activity e g task set representation response inhibition conflict monitoring error detection reward processing emotion regulation and task switching This area of research is relatively young and while scientific evidence is emerging no general consensus has been reached yet on how to interpret these early findings some researchers accept that executive control can involve unconscious processing others momentarily put aside in first approximation this issue others criticize this possibility on theoretical grounds e g pointing to the need of better definitions of terms such as control conflict and consciousness or based on experimental findings At this stage it appears necessary that researchers in the field make a collective effort to deepen the understanding of the unconscious mechanisms involved in executive control This Research Topic will focus on neuroscience but it will welcome contributions on purely behavioural and psychophysiological studies patient reports computational investigations as well as philosophical and historical analyses of the relationship between executive control and consciousness In particular we encourage experts in this field to submit contributions in the form of a reviews opinions and discussions on existing literature concerning unconscious processing of information in executive control b original research

articles both behavioural only and neuroimaging studies on unconscious processing of information in executive control c discussions and opinions on new methodologies to investigate this issue e g other than masked priming which has been the technique of choice in most of the existing studies      *Microsoft Money* ,1992      **The Writers Directory** ,2013
