Mehmeti, Branislav Radeljic, 2017-06-17 Azan on the Moon is an in depth anthropological study of people s lives along the Pamir Highway in eastern Tajikistan Constructed in the 1930s in rugged high altitude terrain the road fundamentally altered the material and social fabric of this former Soviet outpost on the border with Afghanistan and China The highway initially brought sentiments of disconnection and hardship followed by Soviet modernization and development and ultimately a sense of distinction from bordering countries and urban centers that continues to this day Based on extensive fieldwork and

through an analysis of construction mobility technology media development Islam and the state Till Mostowlansky shows how ideas of modernity are both challenged and reinforced in contemporary Tajikistan In the wake of China s rise in Central Asia people along the Pamir Highway strive to reconcile a modern future with a modern past Weaving together the road a population and a region Azan on the Moon presents a rich ethnography of global connections

Drawing Futures Bob Sheil,Frédéric Migayrou,Luke Pearson,Laura Allen,2016-11-11 Drawing Futures brings together international designers and artists for speculations in contemporary drawing for art and architecture Despite numerous developments in technological manufacture and computational design that provide new grounds for designers the act of drawing still plays a central role as a vehicle for speculation There is a rich and long history of drawing tied to innovations in technology as well as to revolutions in our philosophical understanding of the world In reflection of a society now underpinned by computational networks and interfaces allowing hitherto unprecedented views of the world the changing status of the drawing and its representation as a political act demands a platform for reflection and innovation Drawing Futures will present a compendium of projects writings and interviews that critically reassess the act of drawing and where its future may lie Drawing Futures focuses on the discussion of how the field of drawing may expand synchronously alongside technological and computational developments The book coincides with an international conference of the same name taking place at The Bartlett School of Architecture UCL in November 2016 Bringing together practitioners from many creative fields the book discusses how drawing is changing in relation to new technologies for the production and dissemination of ideas
