Killing Us Softly The Global Depopulation Policy:

Conspiracies of Conspiracies Thomas Milan Konda, 2019-03-15 The most comprehensive intellectual history of American conspiracy theories yet produced The American Historical Review It s tempting to think we live in an unprecedentedly fertile age for conspiracy theories with seemingly each churn of the news cycle bringing fresh manifestations of large scale paranoia But the sad fact is that these narratives of suspicion and the delusional psychologies that fuel them have been a constant presence in American life for nearly as long as there s been an America In this sweeping book Thomas Milan Konda traces the country s obsession with conspiratorial thought from the early days of the republic to our own anxious moment Conspiracies of Conspiracies details centuries of sinister speculations from antisemitism and anti Catholicism to UFOs and reptilian humanoids and their often incendiary outcomes Rather than simply rehashing the surface eccentricities of such theories Konda draws from his extraordinary assemblage of conspiratorial writing to crack open the mindsets that lead people toward these self sealing worlds of denial What is distinctively American about these theories he argues is not simply our country s homegrown obsession with them but their ongoing prevalence and virulence Konda proves that conspiracy theories are no harmless sideshow They are instead the dark and secret heart of American political history one that is poisoning the bloodstream of an increasingly sick body politic Meticulous scholarship essential context for understanding our present mess Survival Global Politics and Strategy Incisive and engaging Konda s assessment of the new dynamics of conspiracy theories in contemporary US politics is a significant contribution Written with a clarity of expression rare in academic writing the book is accessible to a wide readership Choice

Killing Us Softly Kevin Mugur Galalae, 2014-04 Our progressive philosophy calls for more freedom and more prosperity for more people Yet author Kevin Galalae says you can t always have more Overpopulation is making us victims of our own triumphs over nature Lacking a popular consensus to control population the ruling elite have resorted to covert means Their depopulation project has had considerable success but at a terrible cost Strict secrecy and deception have been necessary to prevent the masses from discovering the bitter truth that for the past 68 years they have been the object of a silent and global offensive a campaign of attrition that has turned the basic elements of life into weapons of mass infertility and selective death The birth of nearly two billion people has been prevented and the death of half a billion hurried While these goals have been intentional the architects of the Global Depopulation Policy have unintentionally undermined the genetic and intellectual endowment of the human species and have set back eons of natural selection We are adding a billion people every 10 15 years while consumption per person has skyrocketed placing unsustainable demands on resources like water and fuel The only decent alternative is voluntary population control to reduce world population Here are the methods actually being used Contraception and abortion Chemical sterilisation Flouridation BPA contaminated plastic and metal food packaging Drawbacks increase in chronic illnesses and lowering of IQ will lead to massive degeneracy in a couple generations The

coercive one child policy overall a success story for China surgical sterilisation in India Biological synthetic HIV virus in Africa flu viruses GMO crops Lowering human fertility while weakening the immune system to increase mortality Psychosocial weakening the family forcing women to work high divorce rates youth unemployment countercultures drug tobacco and alcohol abuse incarceration accelerated urbanisation Successful in Europe where population has started to shrink Political drawbacks a secret state conducting genocide against its own people sham democracy a culture of deception Endangering the gene pool and the ecosystem Even so it is more humane than the alternative of another world war to reduce numbers Social costs economic decline collapse of social safety nets Sustainable development policies don't mention the risks of covert sterilisation that underpin them Population control as a substitute to war is the progeny of the bipolar world order that followed World War II they agreed to wage a demographic war on their own people and on those within their spheres of influence rather than risk their mutually assured destruction in a nuclear confrontation The way forward broad popular understanding of the issues Yet politicians don't want to open up to a policy based on popular consensus because that would undermine their power which is based on manipulation Aside from his writings the author's efforts to awaken the world have included hunger strikes imprisonment and legal battles

A God in the Moon Roger A Turner, 2019-02-01 *A God in the Moon* Your Guide to the World of the Trinity Matrix Why is quantum science based on the number 3 Why is the trinity of soul mind and body the basic pattern of life Why are most of the world's ancient religions based on the pattern of three Is there an intelligence that has designed this universe based on the number 3 *A God in the Moon* Your Guide to the World of the Trinity Matrix seeks to uncover the truth behind the complexity of ancient and modern beliefs and the words that form a connection with many elements of esoteric and scientific knowledge An investigation of ancient and modern myths brings a clearer view of the Trinity Matrix that the mind of men has weaved to have ultimate control over our fellow humans

After the Spike Dean Spears, Michael Geruso, 2025-07-10 An eye opening exploration of humanity's unprecedented path to global depopulation and why it's in everyone's interests to prevent it Stunning essential reading DANIEL H PINK author of *Drive* If we continue as we are the world's population will peak in the next few decades and then begin a sudden rapid decline It would be easy to think that fewer people would be better better for the planet better for the people who remain In *After the Spike* two leading population economists ask us to think again Carefully weighing the evidence that surrounds this controversial subject Dean Spears and Mike Geruso explain why depopulation is not the solution some purport it to be Instead as humanity's future shrinks it will become increasingly fragile and less certain making it even harder to escape poverty disease and injustice Halting this decline need not mean sacrificing a greener future or reverting to past inequities in fact it can only be achieved with women's reproductive rights and individual choice as driving forces But if we want future generations to enjoy lives better than our own it's time to take seriously our collective task of lifting the burdens of parents and other carers Deeply reasoned and uncompromisingly humane *After the Spike* sheds important light on a dramatic shift in

the human story and asks us to consider what future we want for our planet our children and one another Remarkable has challenged and changed my thinking about population PETER SINGER author of Animal Liberation Dissolves our preconceptions through evidence rigour and a deep compassion for all TOBY ORD author of The Precipice Insights and rigour are matched by a human and empathetic narrative throughout HANNAH RITCHIE author of Not the End of the World I had my mind blown over and over ZACH WEINERSMITH coauthor of A City on Mars After the Spike: The Risks of Global Depopulation and the Case for People Dean Spears,2026-07-09 Depopulation as a Policy Challenge in the Context of Global Demographic Trends Wolfgang Lutz,Nicholas Gailey,2020 *After the Spike* Dean Spears,Michael Geruso,2025-07-31 Most people on Earth today live in a country where birth rates already are too low to stabilize the population fewer than two children for every two adults In *After the Spike* economists Dean Spears and Michael Geruso sound a wakeup call explaining why global depopulation is coming why it matters and what to do now It would be easy to think that fewer people would be better better for the planet better for the people who remain This book invites us all to think again Despite what we may have been told depopulation is not the solution we urgently need for environmental challenges like climate change Nor will it raise living standards by dividing what the world can offer across fewer of us Spears and Geruso investigate what depopulation would mean for the climate for living standards for equity for progress for freedom for humanity s general welfare And what it would mean if instead people came together to share the work of caregiving and of building societies where parenting fits better with everything else that people aspire to With new evidence and sharp insights Spears and Geruso make a lively and compelling case for stabilizing the population without sacrificing our dreams of a greener future or reverting to past gender inequities They challenge us to see how depopulation threatens social equity and material progress and how welcoming it denies the inherent value of every human life More than an assembly of the most important facts *After the Spike* asks what future we should want for our planet for our children and for one another
