Life Orientation 2013 November:

White Lies Christopher M. Driscoll, 2015-10-23 *White Lies* considers African American bodies as the site of cultural debates over a contested white religion in the United States Rooting his analysis in the work of W E B DuBois and James Baldwin Christopher Driscoll traces the shifting definitions of white religion from the nineteenth century up to the death of Michael Brown and other racial controversies of the present day He engages both modern philosophers and popular imagery to isolate the instabilities central to a white religion including the inadequacy of this framing concept as a way of describing and processing death The book will be of interest to students and scholars interested in African American Religion philosophy and race and Whiteness Studies **Exploring Positive Psychology** Erik M. Gregory, Pamela B. Rutledge, 2016-10-03

Looking for an introduction to positive psychology that offers real life examples This overview of the science of happiness supplies case studies from some of the world s most successful organizations and describes ways to experience the personal impact of this exciting scientific field Rather than focusing on treating what is wrong with a person positive psychology seeks to understand and foster the things that drive happiness creativity and emotional fulfillment This is a relatively new area of psychological study and this reference book presents the research and practice of positive psychology in an informative and accessible format Readers are given a history of the field its current applications and the future implications of this psychological discipline Case studies from companies such as The Body Shop Volvo Zappos and Google highlight the impact of positive psychology when it s applied in a modern business setting These case studies along with biographies of leaders in the field highlight each chapter and connect the dots between the empirical theory of positive psychology and its practice Readers also receive tools to apply the practices to their own lives [The International Handbook of Positive Psychology](#)

Roman Empire to Byzantium Geoffrey Dunn, Wendy Mayer, 2015-07-14 The essays collected in *Christians Shaping Identity* celebrate Pauline Allen s significant contribution to early Christian late antique and Byzantine studies especially concerning bishops heresy orthodoxy and christology Covering the period from earliest Christianity to middle Byzantium the first eighteen essays explore the varied ways in which Christians constructed their own identity and that of the society around

them A final four essays explore the same theme within Roman Catholicism and oriental Christianity in the late 19th to 21st centuries with particular attention to the subtle relationships between the shaping of the early Christian past and the moulding of Christian identity today Among the many leading scholars represented are Averil Cameron and Elizabeth A Clark

Psychology of Career Adaptability, Employability and Resilience Kobus Maree, 2017-12-05 This book examines how the career counselling profession should respond to the changes in the world of work that have resulted from the increasing need to communicate faster and disseminate information more efficiently It emphasizes the twin aims of enhancing a persons career adaptability and helping them to become more employable rather than linearly trying to find a job and remaining in one organisation for their entire career lives The book shows that to achieve these aims people need to acquire career resilience especially since the world of work no longer provides workers with work holding environments for the duration of their career lives It takes into account historical analyses which show that whenever major technological change has occurred and widespread job losses have ensued people have managed to use the new technology to create new employment opportunities Readers from career psychology and management research vocational and professional career coaching and students of career psychology will find this book delivers sound updated theory demonstrating how perceived threats in the 21st century can conceivably be turned into opportunities
