Saikali, 1996 *A Condition for Linear Inequalities and Linear Programs* Olvi L. Mangasarian, 1981 *New Perspectives on the Theory of Inequalities for Integral and Sum* Nazia Irshad, Asif R. Khan, Faraz Mehmood, Josip E. Pecaric, 2022-04-19

This book provides new contributions to the theory of inequalities for integral and sum and includes four chapters. In the first chapter, linear inequalities via interpolation polynomials and Green functions are discussed. New results related to Popoviciu type linear inequalities via extension of the Montgomery identity, the Taylor formula, Abel, Gontscharoff's interpolation polynomials, Hermite interpolation polynomials, and the Fink identity with Green's functions are presented. The second chapter is dedicated to Ostrowski's inequality and results with applications to numerical integration and probability theory. The third chapter deals with results involving functions with nondecreasing increments. Real life applications are discussed as well as the connection of functions with nondecreasing increments together with many important concepts including arithmetic integral mean, Wright convex functions, convex functions, nabla convex functions, Jensen m -convex functions, m -convex functions, m -nabla convex functions, k -monotonic functions, absolutely monotonic functions, completely monotonic functions, Laplace transform, and exponentially convex functions by using the finite difference operator of order m . The fourth chapter is mainly based on Popoviciu and Cebyshev, Popoviciu type identities and inequalities. In this last chapter, the authors present results by using delta and nabla operators of higher order. *Linear Equations and Inequalities* Alpha & Omega Publishing, 2001-03-01
