Aly Madhavji, Jiayi Hu, Sameer Masood, Manveen Puri, 2016-06-30 It is commonly known that the application process to medical school is competitive From our experience about 1% of students who express an interest in becoming a physician during their first year of undergraduate studies eventually matriculate into medical school While pursuing a career in medicine remains a dream for many and is considered the endpoint of a journey many different paths can lead towards that destination Given the significant time commitment required for a successful application the decision to pursue medicine is one of the biggest decisions many high school and undergraduate students face However many applicants do not look beyond gaining the coveted admission letter and are then left with an incomplete understanding of what medical school entails and the diverse career paths they can take after obtaining their MD One of the primary reasons for this is that despite significant progress made in recent years medicine remains a closed door career A large proportion of students in our medical class had at least one immediate relative within the profession which is also reflected in the literature The barriers created by such exclusivity make it difficult for those who have not been socialized into the profession from a young age to navigate the unspoken pitfalls of the admissions process This book attempts to break down some of those barriers It focuses on every component of the medical school application process It differs from the many other books written on this subject by taking an experiential approach We believe that the best way to learn about medical school acceptance is to garner advice from those who have recently achieved that milestone as well as from individuals in related professions who can provide valuable
