The background of the cover features a stylized world map with green lines connecting various points, suggesting a global network. In the foreground, the silhouettes of several people are seated in a circle, facing a bright, glowing sun or light source that creates a strong lens flare effect. The overall color palette is dominated by warm oranges and yellows from the light source, contrasting with the cool blues and greens of the map and the dark silhouettes.

Financial Accounting And Business Law Dr. M. Shahid Ahmed, 2023-10-26 Law is essential to the establishment and maintenance of social order in our society But we also need to recognise that there are other ways to establish order outside the legal system as it now exists Order is not only based on the law it also encompasses issues of a broader moral and political nature even in our society An explanation of the form of order in general is not the focus of this work More specifically it focuses on outlining and clarifying the essential institutional components of the specific kind of order known as legal order Business and commercial activity are ultimately controlled and regulated by law and they occur within a legal framework A challenge that faces anyone studying business activity is that business enterprise occurs in a broad and general legal environment however the student must possess more than a cursory understanding of the legal procedures and regulations that affect business activity This book specifically addresses this issue This book's main goal is to provide students with a companion that is simple to teach while covering the necessary curriculum Our aim has been to include the most recent curriculum updates for undergraduate graduate and postgraduate programmes offered by different centres and state universities The Contract Act the Sale of Goods Act and the Negotiable Instrument Act are among the many acts that are addressed in this book

The evaluation of financial risk profile of the companies and the mandatory disclosure on Liquidity and Credit Risk Olga Cucaro, 2020-10-18 THE EVALUATION OF FINANCIAL RISK PROFILE OF THE COMPANIES AND THE MANDATORY DISCLOSURE ON LIQUIDITY AND CREDIT RISK is a work born from a careful study of the evolution of the Italian and European legislation on the subject of financial risk communication and in particular of IFRS 7 Financial Instruments Disclosure Thanks to this international accounting standard Italian listed companies have included a

greater number of disclosures on financial risks in their financial statements but while there is no doubt the quantitative increase in information the qualitative value of this communication is doubtful In this regard the study analyzes the usefulness of the disclosure introduced by IFRS 7 for financial analysts The choice of analysts is a natural choice due to the importance they hold as intermediaries in the communication channel between companies and the market

Achieving Service Excellence C. M. Chang, 2013-11-20 As the service sectors play an increasingly important role in all economies worldwide service executives and professionals are well advised to recognize two main pathways to achieving sustainable success in services The first path requires enhancing the strategic differentiation and operational excellence of their service enterprises the second requires that these executives and their employees develop the knowledge and skills needed to achieve such success Specifically this book discusses actionable methodologies needed to generate creative ideas including deciding on which ones to pursue on how to justify projects financially on how to manage the development projects for innovative services and on how to reach out to customers and offer them superior service support

Taxation in the Digital Economy Nella Hendriyetty, Chris Evans, Chul Ju Kim, Farhad Taghizadeh-Hesary, 2022-07-11 A robust and efficient tax administration in a modern tax system requires effective tax policies and legislation Policy frameworks should cover all aspects of tax administration and include the essential processes of capturing processing analyzing and responding to information provided by taxpayers and others concerning taxpayers affairs By far the greatest challenges facing tax administrations in all countries are those posed by the continuing developments in the digital economy Whereas societies are grappling to come to terms with the transitions from the third industrial or digital revolutions revenue authorities grapple with the consequences for the sustainability of their tax bases and the efficient administration and collection of taxes This book presents a critical review of the status of tax systems in Asia and the Pacific in the era of the digital economy The book suggests how countries can maximize their domestic resource mobilization when confronted by the challenges that digitalization inevitably produces as well as how they can best harness or take advantage of aspects of digitalization to serve their own needs The full implications of the COVID 19 crisis are still too uncertain to predict but it is clear that the crisis will accelerate the trend towards digitalization and also increase pressures on public finances This in turn may shape the

preference for and the nature of both multilateral and unilateral responses to the tax challenges posed by digitalization and the need to address them This book will be a timely reference for those researching on taxation in digital economy and for policy makers The Open Access version of this book available at www.taylorfrancis.com has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license Subject Guide to Books in Print ,2001
