River Delta Futures Francisco-J. Hernández Adrián, Angelos Theocharis, 2025-02-20 How are climate change weather-related disasters, food and water insecurity, and energetic and infrastructural collapse narrated audiovisually in the most environmentally vulnerable areas of the Planet? This book addresses this and related questions by adopting a local and transdisciplinary perspective on river deltas from different areas of the world. River deltas have historically been hotspots for human civilizations, as populations settled in their fertile grounds seeking resources and opportunities for prosperity. Despite this, the terrains and livelihoods of those who rely on them are under threat from human exploitation, environmental degradation, and rapidly accelerating climate change. Inspired by the UN Sustainable Development Goals, this book provides a range of focused audiovisual analyses of deltaic spaces. Ranging across a variety of media including documentary filmmaking, animation, photography, collaborative comic making, participatory visual art practices, soundwalking, and film analysis, it examines the role that contemporary audiovisual media play in forging global environmental imaginaries. In doing so, it adopts a transdisciplinary approach to the Blue Humanities from countries across the world, including Canada, Bolivia, Brazil, Greece, Nigeria, Senegal, India, Bangladesh, Myanmar, Thailand, and Vietnam.

Emerging Technologies for Education Tien-Chi Huang, Rynson Lau, Yueh-Min Huang, Marc Spaniol, Chun-Hung Yuen, 2017-12-15 This book constitutes the thoroughly refereed post-workshop proceedings of the Second International Symposium SETE 2017 held in conjunction with ICWL 2017 in Cape Town, South Africa, in September 2017. The 52 full and 13 short papers were carefully reviewed and selected from 123 submissions. This symposium attempts to provide opportunities for the crossfertilization of knowledge and ideas from researchers in diverse fields that make up this interdisciplinary research area.
