

Innovation for Tomorrow

Since Daihatsu first began operations in 1961, the company has maintained focus on a single goal: creating the finest compact vehicles possible. Our ongoing commitment to tomorrow reflects our commitment to pursuing the highest levels of comfort, safety, style, function and performance in every car. This pursuit has led to our continuously developing new technologies and creating superior vehicles loved by people in more than 160 countries. The advantages of compact cars - superior economy, environmental performance, driving ease, maneuverability and convenience in city traffic - are more important now than ever before. That's why all over the world, more & more are finding the compact car to be the right answer to their moving needs.

As markets continue to expand in countries all around the globe, minimizing impact to the environment has become a vital concern. Daihatsu is leading the way in environmental performance, actively developing technologies aimed at reducing the impact cars have on the future around us. The company has already made considerable progress on many fronts. Our new engines include exhaust emission purification technology that decreases CO₂ (a major cause of global warming) as well as EGR and MGR technologies that improve fuel efficiency and thus reduce petrol consumption. Designs that make it easier to disassemble and recycle a vehicle once its service life has ended, and our revolutionary "intelligent canopy" - the world's first canopy type that self-regenerates to maintain surrounding emissions, reducing particulates over an extended service life.

Because drivers and their families use their compact cars every day, safety is a top priority. Accordingly, Daihatsu has devoted extensive effort to developing an advanced vehicle safety body that improves safety in all types of collisions, as well as air bags and devices that protect all passengers. We even design our vehicle bodies to minimize potential injury to pedestrians involved in an accident. Daihatsu is also energetically researching and developing "automotive intelligence" technologies aimed at enhancing driver safety and comfort. For example, development is under way of a radar-based cruise control system that keeps the car a constant distance behind the vehicle ahead of it, reducing stress on the driver and improving safety. As one of the world's leading manufacturers of compact cars, Daihatsu feels a responsibility to create and continuously improve systems, designs and technologies that give drivers and their families the peace of mind that comes with outstanding safety.

People, nature, automobility. Daihatsu aims to create an optimal balance between the cars we drive and the world we live in. We envision a future in which cars and the environment coexist in perfect harmony. The will and that vision reflected in every vehicle we design, and you will feel that vision come to life every time you drive a Daihatsu car. At Daihatsu, we're driving ahead toward a future in which everyone can enjoy the many benefits the world's finest compact cars provide.
