**The Routledge Handbook of the History of the Middle East Mandates** Cyrus Schayegh,Andrew Arsan,2015-06-05 The Routledge Handbook of the History of the Middle East Mandates provides an overview of the social political economic and cultural histories of the Middle East in the decades between the end of the First World War and the late 1940s when Britain and France abandoned their Mandates It also situates the history of the Mandates in their wider imperial international and global contexts incorporating them into broader narratives of the interwar decades In 27 thematically organised chapters the volume looks at various aspects of the Mandates such as The impact of the First World War and the development of a new state system The impact of the League of Nations and international governance Differing historical perspectives on the impact of the Mandates system Techniques and practices of government The political social economic and cultural experiences of the people living in and connected to the Mandates This book provides the reader with a guide to both the history of the Middle East Mandates and their complex relation with the broader structures of imperial and international life It will be a valuable resource for all scholars of this period of Middle Eastern and world history

**The Great War in the Middle East** Robert Johnson,James Kitchen,2019-01-30 Traditionally in general studies of the First World War the Middle East is an arena of combat that has been portrayed in romanticised terms in stark contrast to the mud blood and presumed futility of the Western Front Battles fought in Egypt Palestine Mesopotamia and Arabia offered a different narrative on the Great War one in which the agency of individual figures was less neutered by heavy artillery As with the historiography of the Western Front which has been the focus of sustained inquiry since the mid 1960s such assumptions about the Middle East have come under revision in the last two decades a reflection of an emerging global turn in the history of the First World War The sideshow theatres of the Great War Africa the Middle East Eastern Europe and the Pacific have come under much greater scrutiny from historians The fifteen chapters in this volume cover a broad range of perspectives on the First World War in the Middle East from strategic planning issues wrestled with by statesmen through to the experience of religious communities trying to survive in war zones The chapter authors look at their specific topics through a global lens relating their areas of research to wider arguments on the history of the First World War

**French Mediterraneans** Patricia M. E. Lorcín,Todd Shepard,2016-05 While the Mediterranean is often considered a distinct unified space recent scholarship on the early modern history of the sea has suggested that this perspective is essentially a Western one devised from the vantage point of imperial power that historically patrolled the region's seas and controlled its ports By contrast for the peoples of its southern shores the Mediterranean was polymorphous shifting with the economic and seafaring exigencies of the moment Nonetheless by the nineteenth century the idea of a monolithic Mediterranean had either been absorbed by or imposed on the populations of the region In French Mediterraneans editors Patricia M E Lorcín and Todd Shepard offer a collection of scholarship that reveals

the important French element in the nineteenth and twentieth century creation of the singular Mediterranean These essays provide a critical study of space and movement through new approaches to think about the maps migrations and margins of the sea in the French imperial and transnational context By reconceptualizing the Mediterranean this volume illuminates the diversity of connections between places and polities that rarely fit models of nation state allegiances or preordained geographies

*La paix qu'il faut à la France* Charles Arthur Édouard Xavier Maitrot,1919      The Origins of the Lebanese National Idea Carol Hakim,2013-01-19 In this fascinating study Carol Hakim presents a new and original narrative on the origins of the Lebanese national idea Hakim s study reconsiders conventional accounts that locate the origins of Lebanese nationalism in a distant legendary past and then trace its evolution in a linear and gradual manner She argues that while some of the ideas and historical myths at the core of Lebanese nationalism appeared by the mid nineteenth century a coherent popular nationalist ideology and movement emerged only with the establishment of the Lebanese state in 1920 Hakim reconstructs the complex process that led to the appearance of fluid national ideals among members of the clerical and secular Lebanese elite and follows the fluctuations and variations of these ideals up until the establishment of a Lebanese state The book is an essential read for anyone interested in the evolution of nationalism in the Middle East and beyond

S.l., n.d. - "Confidentiel". Paul Bourdarie, *Annales du Sénat* France. Assemblée nationale (1871-1942). **L'Europe nouvelle; revue hebdomadaire des questions extérieures, économiques et littéraires** ,1919      Le problème politique syrien Benoit Aboussouan,1925      Etudes religieuses, historiques et littéraires ,1915 Etudes de th ologie de philosophie et d histoire      Bibliographie générale des sciences juridiques, politiques, économiques et sociales de 1800 à 1925-1926 A. Grandin,1926      *Bulletin du Comité de l'Asie française* ,1914      The Categories of Grammar Alan Huffman,1997-01-01 This book offers an analysis of the French clitic object pronouns lui and le in the radically functional Columbia school framework contrasting this framework with sentence based treatments of case selection It suggests that features of the sentence such as subject and object relations normally taken as pretheoretical categories of observation about language are in fact part of a theory of language which does not withstand empirical testing It shows that the correct categories are neither those of structural case nor those of lexical case but rather semantic ones Traditionally anomalies in the selection of dative and accusative case in French such as case government use of the dative for possession and disadvantaging its use in the faire causative construction and other puzzling distributional irregularities have been used to support the idea of an autonomous non functional central core of syntactic phenomena in language The present analysis

proposes semantic constants for *lui* and *le* which render all their occurrences explicable in a straightforward way. The same functional perspective informs issues of cliticity and pronominalization as well. The solution offered here emerges from an innovative instrumental view of linguistic meaning: an acknowledgment that communicative output is determined only partially and indirectly by purely linguistic input, with extralinguistic knowledge and human inference bridging the gap. This approach entails identification of the pragmatic factors influencing case selection and a reevaluation of thematic role theory and reveals the crucial impact of discourse on the structure as well as the functioning of grammar. One remarkable feature of the study is its extensive and varied data base. The hypothesis is buttressed by hundreds of fully contextualized examples and large scale counts drawn from modern French texts.
