La Grande Bifurcation:

Latour and the Passage of Law McGee Kyle McGee, 2016-08-18 These 13 essays explore Bruno Latour's legal theory from a variety of disciplinary perspectives. They combine analytical tools drawn from Latour's actor network theory developed in *Science in Action*, *Reassembling the Social* and *The Making of Law* with the philosophical anthropology of the *Moderns in An Inquiry into Modes of Existence* to blaze a new trail in legal epistemology.

Bernard Stiegler and the Philosophy of Education II Joff P. N. Bradley, 2023-08-22 This is the second volume of research into the philosophy of Bernard Stiegler and its interconnections with the philosophy of education. Building on the first edited collection, Stiegler's philosophy is introduced to scholars in the field of the philosophy of education in the hope that researchers dig deep into his philosophy and apply it to their own educational context in order to produce new forms of knowledge that are negentropic forms of knowledge which may counter the endemic crises we see in educational institutions in towns, cities and villages across the planet. This second volume throws down the gauntlet to others to find new ways to contest toxic forms of digital life inside and outside education and to challenge entrenched and conservative ways of teaching and learning in the 21st century. The writers in this volume from Australasia, Europe and across South, Southeast and East Asia do a remarkable job of translating Bernard Stiegler's sometimes complicated language into ways which are interpretable, applicable and communicable to those who witness day in, day out in their schools, universities and institutions the struggle to capture the hearts and minds of young people. This book was originally published as a special issue of the journal *Educational Philosophy and Theory*.

Political Economy and Sociolinguistics David Block, 2018-02-08 Shortlisted for the BAAL Book Prize 2019. This book explores how political economy intersects with sociolinguistics, specifically how neoliberalism, inequality and social class mediate language in society issues. After the preface in which the author sets the scene for the content of the book, Chapter 1 is an extensive though selective review of sociolinguistics research which has been framed as political economic in orientation. The chapter concludes that such research generally contains little in the way of thorough and in-depth coverage of the key ideas and conceptual frameworks said to undergird it. With this consideration in mind, Chapters 2, 3 and 4 are organised around in-depth discussions of respectively political economy as a general disciplinary frame, neoliberalism as the variegated variety of capitalism dominant in the world today and stratification, inequality and social class as phenomena intrinsic to capitalism which in the neoliberal era have come to the fore as key issues. Drawing directly on the background provided in Chapters 2-4, Chapters 5 and 6 explore two distinct political economy informed lines of research: on the one hand, the neoliberal citizen and on the other hand, discursive class warfare. The book ends with an epilogue addressing issues arising around political economy in sociolinguistics.

Bernard Stiegler and the Philosophy of Education Joff P.N. Bradley, David Kennedy, 2021-05-13 This book is the first of its kind to critically examine the philosophy of Bernard Stiegler from the perspective of the philosophy of education. The editors of this book firmly believe that in the

coming years Stiegler's philosophy will assume increasing importance and influence in both digital studies and the philosophy of education as his thought is a prism through which to understand how we live and work and a means to anticipate what the future may hold for us all in the time of the Anthropocene. They are of the view that Stiegler's work will have a permanent impact on the intellectual terrain of the twenty-first century as his majestic conceptual architectonic will shape political, social, and pedagogical debates in the coming decades. With this in mind, the contributors of this book take up his gauntlet to understand the risks and opportunities of the digital pharmakon and its impact on the educational milieu. The chapters in this book were originally published as a special issue of *Educational Philosophy and Theory*. **LES RELIGIONS DES PEUPLES NONCIVILISES** ALBERT REVILLE, 1883 **The French May** Lilian Mathieu, 2025-11-13 It is now time to stop revering May 68 as a political myth but to consider it as it was meaning as a social movement that unexpectedly turned into a tremendous political crisis bringing French institutions near to collapse. Relying on original data such as unprecedented archives and personal interviews with former sixty-eighters, the book brings new light on how the revolt was unleashed not only among Paris students but the whole French population challenged all established hierarchies, shook culture and mores, deeply affected its participants' life course, and contributed to a worldwide context of protest. **Les Armées françaises dans la Grande Guerre** France.
