Mei Past Papers C1 2013:

Methods and Applications in Educational Psychology Antonio P. Gutierrez de Blume, Kai-Yu Tang, María Soledad Segretin, Christelle Declercq, Mei-Shiu Chiu, 2023-10-13

Handbook on Biological Warfare Preparedness S.J.S. Flora, Vidhu Pachauri, 2019-10-05 Handbook on Biological Warfare Preparedness provides detailed information on biological warfare agents and their mode of transmission and spread. In addition, it explains methods of detection and medical countermeasures including vaccine and post exposure therapeutics with specific sections detailing diseases, their transmission, clinical signs and symptoms, diagnosis, treatment, vaccines, prevention and management. This book is useful reading for researchers and advanced students in toxicology but it will also prove helpful for medical students, civil administration, medical doctors, first responders and security forces. As the highly unpredictable nature of any event involving biological warfare agents has given rise to the need for the rapid development of accurate detection systems, this book is a timely resource on the topic. Introduces different bacterial and viral agents including Ebola and other emerging threats and toxins. Discusses medical countermeasures including vaccines and post exposure therapeutics. Includes a comprehensive review of current methods of detection.

Hydrothermal and Submarine Volcanic Activity: Impacts on Ocean Chemistry and Plankton Dynamics Sophie Bonnet, Ilana Berman-Frank, Douglas G. Capone, Jessica Nicole Fitzsimmons, Cecile Guieu, Joseph A. Resing, 2025-11-06 Most sites of submarine hydrothermal activity remain unknown, unexplored and uncharacterized. Although we have limited understanding of how these systems interact with and influence the broader ocean, recent explorations are illuminating a causal link between the solid earth and ocean function. Recent explorations of hydrothermal sites are highlighting the impacts and their feedbacks between geology, chemistry, physics and biology at different space and time scales. These processes extend from the seafloor through the water column and even sometimes up to the surface layer. In fact, recent discoveries of hydrothermal activity at shallow sites emitting trace metal rich fluids able to reach the euphotic productive ocean layer 0-100 m are likely to modify our understanding of the interactions between hydrothermal systems and ocean biogeochemical cycles. This Research Topic welcomes Original Research, Review, Mini Review, Perspective and Opinion articles focusing on subjects such as: The lateral and vertical transport mechanisms of hydrothermal plumes into the ocean in various systems; The impacts of hydrothermal activity on surface and deep ocean geochemistry; i.e. distribution, speciation and bioavailability of biogeochemically relevant and toxic

trace elements their isotopes organic matter and gasses The impact of hydrothermal activity on surface ocean communities such as viruses bacteria phytoplankton zooplankton and their diversity activity and impact on marine biogeochemical carbon nitrogen and phosphorus cycles The impact of hydrothermal iron on diazotrophs and feedbacks to plankton community Hydrothermal fluid micro and macro biology The effects of hydrothermal geology geophysics on fluid geochemistry and or biology Research based on a variety of approaches including in situ and satellite observation process studies in controlled or semi controlled systems modeling and omics are welcome
