Eggermont, Vincent N. LaRiccia, 2009-06-02 This is the second volume of a text on the theory and practice of maximum penalized likelihood estimation It is intended for graduate students in statistics operations research and applied mathematics as well as researchers and practitioners in the field The present volume was supposed to have a short chapter on nonparametric regression but was intended to deal mainly with inverse problems However the chapter on nonparametric regression kept growing to the point where it is now the only topic covered Perhaps there will be a Volume III It might even deal with inverse problems But for now we are happy to have finished Volume II The emphasis in this volume is on smoothing splines of arbitrary order but other estimators kernels local and global polynomials pass review as well We study smoothing splines and local polynomials in the context of reproducing kernel Hilbert spaces The connection between smoothing splines and reproducing kernels is of course well known The new twist is that letting the inner product depend on the smoothing parameter opens up new possibilities It leads to asymptotically equivalent reproducing kernel estimators without qualifications and thence via uniform error bounds for kernel estimators to uniform error bounds for smoothing splines and via strong approximations to confidence bands for the unknown regression function It came as somewhat of a surprise that reproducing kernel Hilbert space ideas also proved useful in the study of local polynomial estimators **International Industrial Engineering Conference**, 1986 Introduction to Management Information Systems Robert G.
