accordingly At this point some academicians propose using a multiple set of books to determine Transfer Prices In so doing they argue that managerial requirements can be met and optimal decisions can be reached for the good of the group as a whole In the light of this information a software product named SAP ERP comes to attention with its unique feature in terms of determining Transfer Prices flexibly The multiple valuation approach in this system enables the user set Transfer Prices in different valuation techniques i e legal view group view and profit center view This study investigates the relationship between these two research objects thus aims to verify whether and up to which extent implementing such a system is functional and beneficial by composing Transfer Pricing and managerial requirements that come along with it
