person services offered can no longer be the only option and to keep themselves afloat libraries must offer more in terms of digital services. The convenience of offering mobile and digital services brings a new wave of accessibility to libraries and a new question on just how much libraries will need to change to meet the newfound needs of its patrons. Beyond offering these digital services, libraries are incorporating other types of technology in multifaceted ways such as utilizing artificial intelligence, practices, social media, and big data management. Moreover, libraries are increasingly looking for ways to partner and collaborate with the community, faculty, students, and other libraries in order to keep abreast of the best practices and needs of their users. The Research Anthology on Collaboration, Digital Services, and Resource Management for the Sustainability of Libraries explores emerging strategies and technologies that are redefining the role of the library within communities and academia. This reference book covers extensive ground on all the ways libraries have shifted to manage their resources, digitalize their services, and market themselves within the new technological revolution. These continued shifts for libraries come with benefits, challenges, and future projections that are critical for discussion as libraries continue to strive to remain updated and relevant in times of change. This book is ideal for librarians, archivists, collection managers, IT specialists, electronic resource librarians, practitioners, stakeholders, researchers, academicians, and students who are interested in the current state of libraries and how they are transforming to fit modern needs.

Fair Trade, Corporate Accountability and Beyond Shelley Marshall, 2016-04-15 As trade and production have increasingly crossed international boundaries, private bodies and governments alike have sought new ways to regulate labour standards and advance goals of fairness and social justice. Governments are harnessing social and market forces to advance corporate accountability, while private bodies are employing techniques drawn from command and control regulation to shape the behaviour of business. This collection brings together the research and reflections of a diverse international mix of academics, activists, and practitioners in the fields of fair trade and corporate accountability, representing perspectives from both the industrialized and developing worlds. Contributors provide detailed case studies of a range of social justice governance initiatives, documenting the evolution of established strategies of advocacy and social mobilization, and evaluating the strengths and limitations of voluntary initiatives compared with legally enforceable instruments.
