Risk-based examples and approach for control of *Trichinella* spp. and *Taenia saginata* in meat Food and Agriculture Organization of the United Nations ,World Health Organization,2020-11-03 Human trichinellosis is caused by the consumption of raw or inadequately treated meat from domestic or game animals containing the larvae of parasites of the *Trichinella* species *Taenia saginata* causes bovine cysticercosis a parasitic disease of cattle by the larval stage *Cysticercus bovis* of the human tapeworm *Taenia saginata* Taeniosis infection of humans with the adult tapeworm occurs following consumption of beef with cysticerci that has not been sufficiently heated or frozen to kill the parasite This report provides the spreadsheet models resulted in effective generation of the quantitative information needed by public health officials when evaluating different postmortem meat hygiene programmes for *Trichinella* spp and *Taenia saginata* in meat The models enable the development of science based risk scenarios to assess the effect of various changes to digestion testing and meat inspection for *Trichinella* spp and *Taenia saginata* on the residual risk of human trichinellosis and taeniosis The outcome of estimation is based on changes in relative risks rather than specific estimates of risk *Risk-based examples and approach for control of *Trichinella* spp. and *Taenia saginata* in meat* ,2020-06-30 [The Evolution of Endothermy - From Patterns to Mechanisms](#) Elias T. Polymeropoulos,Rebecca Oelkrug,Martin Jastroch,2018-09-14 Metabolic rate is a key ecophysiological factor determining fitness distribution survival and reproductive strategies of organisms The ability to endogenously produce heat and elevate body temperature beyond ambient has far reaching ecological implications The diversity of thermogenic mechanisms and strategies employed throughout the animal kingdom is truly phenomenal and one of the greatest biological mysteries Interestingly even heat producing plants have been characterised Over the last several decades the oversimplified distinction between warm and cold blooded animals has well and truly been put to rest and the terms endo and ectotherm have been established Birds and mammals are regarded as endotherms capable of maintaining high body temperatures within highly precise boundaries On contrary in ectothermic organisms ambient temperature governs body temperature and metabolism encompassing the majority of present day species However it has recently become very clear that this distinction is still not accurate enough to describe the vastness of heat generating mechanisms within endo but also ectotherms Indeed a plethora of ectothermic animals display endogenous as well as behavioural means of temperature control and mechanisms for heat generation There is large diversity in regards to thermoregulatory ability and strategy within endotherms as well with some groups being classified by separate categories such as basoendotherms and mesotherms Considerable interest and efforts has been put into the quest to understand the underlying physiological mechanisms leading and facilitating high metabolic rates and body temperatures of endotherms These mechanisms are far from being exhaustively studied and the evolutionary trajectory leading to high metabolic rates and stable body temperatures is equally vividly debated This discussion includes an array of questions and theories surrounding the presence of endothermy in extinct dinosaurs In

addition a lively debate surrounds the evolutionary drivers promoting the establishment of endothermy with clear support of direct or indirect selective benefits Within this Research Topic we plan to compile the latest ideas knowledge and experimental work to elucidate the patterns of the evolution of endothermy and its transition distinction from ectothermy The focus is on key physiological mechanisms supporting this transition and contributing to the maintenance of high metabolic rates and body temperature in endotherms as well as mechanisms for local heterothermy and heat dissipation in ectotherms These mechanisms and conclusions may be derived from different levels of organisation such as population taxon species as well as tissue cellular or molecular levels It may also encompass novel experimental or theoretical models testing evolutionary theories of endothermy A comparative approach is encouraged but not fundamental

Animals and African Ethics Kai Horsthemke,2015-07-21 The claim is frequently made on behalf of African moral beliefs and practices that they do not objectify and exploit nature and natural existents like Western ethics does This book investigates whether this is correct and what kind of status is reserved for other than human animals in African ethics

The Training of African Teachers in Natal from 1846-1964 Nicolas Schicketanz,2024-06-07 The history of African teacher training in Natal is one of the most neglected and under researched aspects of educational history This book attempts to set out the administrative history of this field as a first step in stimulating the further research that is so urgently needed Print edition not for sale in Sub Saharan Africa

The Political Economy of Energy in Sub-Saharan Africa Lucky E. Asuelime,Andrew Emmanuel Okem,2017-09-29 A deepening ecological crisis is rearing its head in sub Saharan Africa as it faces a myriad of challenges in regards to the development of its energy sector The dirty now and clean up later approach to the environment has a strong appeal particularly because it is often thought of as the last place to try to edge in another priority especially if that priority is perceived by many to be an economic luxury Asuelime and Okem bring together a team of specialist contributors who investigate to what extent sub Saharan Africa has displayed foresight or politico economic integrity The book shows the state s ability to meet the demands of provision of energy in sub Saharan Africa has led to heavy investments in infrastructure transmission and distribution of energy to the citizens However the inefficiencies corruption and unhealthy bureaucratic challenges that accompany this have led urgent problems which will be thoroughly explored in this book The Political Economy of Energy in Sub Saharan Africa will be of interest to students and scholars of African Studies Development Studies political science and environment

Winnie and Nelson Jonny Steinberg,2023-05-02 A NATIONAL BOOK CRITICS CIRCLE AWARD WINNER THE SUNDAY TIMES LITERARY AWARD WINNER AN LA TIMES BOOK PRIZE FINALIST A WASHINGTON POST AND NEW YORKER

BEST BOOK OF THE YEAR A deeply researched shattering new account of Nelson Mandela's relationship with Winnie Madikizela Mandela that does justice both to the couple's political heroism and to the betrayals and the secrets that hounded their union The New Yorker Drawing on never before seen material Steinberg one of South Africa's foremost nonfiction writers reveals the fractures and stubborn bonds at the heart of a volatile and groundbreaking union a very modern political marriage that played out on the world stage Powerful intimate The Washington Post One of the most celebrated political leaders of a century Nelson Mandela has been written about by many biographers and historians But in one crucial area his life remains largely untold his marriage to Winnie Madikizela Mandela During his years in prison Nelson grew ever more in love with an idealized version of his wife courting her in his letters as if they were young lovers frozen in time But Winnie every bit his political equal found herself increasingly estranged from her jailed husband's politics Behind his back she was trying to orchestrate an armed seizure of power a path he feared would lead to an endless civil war Jonny Steinberg tells the tale of this unique marriage its longings its obsessions its deceptions making South African history a page turning political biography Winnie and Nelson is a modern epic in which trauma doesn't affect just the couple at its center but an entire nation It is also a Shakespearean drama in which bonds of love and commitment mingle with timeless questions of revolution such as whether to seek retribution or a negotiated peace Steinberg reveals with power and tender emotional insight how far these forever entwined leaders would go for each other and where they drew the line For in the end both knew theirs was not simply a marriage but a contest to decide how apartheid should be fought The Entomologist's Monthly Magazine ,2015
