Memo 2014 Geography Paper 2 Grade 1:

Asymmetric Crisis in Europe and Possible Futures Johannes Jäger, Elisabeth Springler, 2015-04-10 The crisis in Europe is often discussed as a crisis of European integration or a crisis of national economies within Europe Both the methodological Europeanism and methodological nationalism miss out the important links between economic and political processes at different spatial scales within Europe and therefore asymmetries and phenomena of uneven development In addition a discussion of possible scenarios which systematically addresses the implications of anti crisis policies is missing This volume seeks to close this gap by systematically integrating the analysis of economic policy or technical solutions to the crisis within a broader framework of political economy It argues that combining critical political economy approaches and post Keynesian perspectives allows for a systematic understanding of the economic and political dimensions of the crisis Although both approaches have the capacity to deal with asymmetries and uneven development the heterogeneity in Europe has been an often largely neglected dimension of analysis However this recent crisis has shown that this is an essential dimension which has to be addressed in order to better understand the dynamics of European development and integration Hence this book aims to deal with asymmetries in Europe and to bridge the gap between the two perspectives This work will initiate an integrative debate that is crucial for a deeper understanding of the current crisis and is an important resource for all students and scholars of IPE European political economy and European politics *Taken For A Ride* Matteo Rizzo, 2017-05-19 How does public transport work in an African city under neoliberalism Who owns what in it Who has the power to influence its shape and changes in it over time What does it mean to be a precarious and informal worker in the private minibuses that provide public transport in Dar es Salaam These are the main questions that inform this in depth case study of Dar es Salaam s public transport system over more than forty years The growth of cities and informal economies are two central manifestations of globalization in the developing world Taken for a Ride addresses both drawing on long term fieldwork in Dar es Salaam Tanzania and charting its public transport system s journey from public to private provision This new addition to the Critical Frontiers of Theory Research and Practice in International Development Studies series investigates this shift alongside the increasing deregulation of the sector and the resulting chaotic modality of public transport It reviews state attempts to regain control over public transport and documents how informal wage relations prevailed in the sector The changing political attitude of workers towards employers and the state is investigated from an initial incapacity to respond to exploitation to the political organisation and unionisation which won workers concessions on labour rights A longitudinal study of workers throws light on patterns of occupational mobility in the sector and the political and economic interests that shaped the introduction of Bus Rapid Transit in Dar es Salaam and local resistance to it are analysed Taken for a Ride reveals the political economy of public transport exposing the limitations of market fundamentalist and post colonial scholarship on economic informality the urban experience in developing countries and the failure to locate

the agency of the urban poor within their economic and political structures It is both a contribution and a call for the contextualised study of actually existing neoliberalism The Rights of Women Erika Bachiochi,2021-07-15 Erika Bachiochi offers an original look at the development of feminism in the United States advancing a vision of rights that rests upon our responsibilities to others In The Rights of Women Erika Bachiochi explores the development of feminist thought in the United States Inspired by the writings of Mary Wollstonecraft Bachiochi presents the intellectual history of a lost vision of women s rights seamlessly weaving philosophical insight biographical portraits and constitutional law to showcase the once predominant view that our rights properly rest upon our concrete responsibilities to God self family and community Bachiochi proposes a philosophical and legal framework for rights that builds on the communitarian tradition of feminist thought as seen in the work of Elizabeth Fox Genovese and Jean Bethke Elshtain Drawing on the insight of prominent figures such as Sarah Grimk Frances Willard Florence Kelley Betty Friedan Pauli Murray Ruth Bader Ginsburg and Mary Ann Glendon this book is unique in its treatment of the moral roots of women s rights in America and its critique of the movement s current trajectory The Rights of Women provides a synthesis of ancient wisdom and modern political insight that locates the family s vital work at the very center of personal and political self government Bachiochi demonstrates that when rights are properly understood as a civil and political apparatus born of the natural duties we owe to one another they make more visible our personal responsibilities and more viable our common life together This smart and sophisticated application of Wollstonecraft s thought will serve as a guide for how we might better value the culturally essential work of the home and thereby promote authentic personal and political freedom The Rights of Women will interest students and scholars of political theory gender and women s studies constitutional law and all readers interested in women s rights *The Coming of Neo-Feudalism* Joel Kotkin,2023-01-10 Following a remarkable epoch of greater dispersion of wealth and opportunity we are inexorably returning towards a more feudal era marked by greater concentration of wealth and property reduced upward mobility demographic stagnation and increased dogmatism If the last seventy years saw a massive expansion of the middle class not only in America but in much of the developed world today that class is declining and a new more hierarchical society is emerging The new class structure resembles that of Medieval times At the apex of the new order are two classes a reborn clerical elite the clerisy which dominates the upper part of the professional ranks universities media and culture and a new aristocracy led by tech oligarchs with unprecedented wealth and growing control of information These two classes correspond to the old French First and Second Estates Below these two classes lies what was once called the Third Estate This includes the yeomanry which is made up largely of small businesspeople minor property owners skilled workers and private sector oriented professionals Ascendant for much of modern history this class is in decline while those below them the new Serfs grow in numbers a vast expanding property less population The trends are mounting but we can still reverse them if people understand what is actually occurring and have the capability to oppose them **America's Moment**

Rework America,2015-06-15 It is time for a new conversation Amid the biggest economic transformation in a century the challenge of our time is to make sure that all Americans benefit from the wave of digital revolutions around the world that have permeated and upended modern life Yet today s economic arguments seem stuck We need a new vision of a hopeful future and a new action agenda So many Americans are uncertain about the future How can there be so many paths to opportunity with so few people traveling them As a nation we have to understand what is required to help Americans succeed now and how to prepare our country for what comes next We have been here before A hundred years ago America experienced the greatest economic transformation and technological revolution in its history The transformation of the past twenty years as the world has moved through the information era into the digital age has turned our life and work upside down once again It is a time of tremendous change but also of tremendous possibility Rework America is a group of American leaders who know from experience the challenges we face and the potential solutions In America s Moment they suggest a practical agenda for an exciting future It is illustrated by people who are already showing the way and includes actions Americans can take today in their own communities preparing people to succeed using the reach of the Internet and data to innovate jobs and to reach new markets all over the world using technology to match employers and workers and transitioning to a no collar working world neither blue collar nor white collar Set against the history of how Americans succeeded once before in remaking their country America s Moment is about the future It describes how the same forces of change technology and a networked world can become tools that can open opportunity to everyone
