Memo Geography Paper June 2013:

The Oxford Companion to the Economics of China Shenggen Fan, Ravi Kanbur, Shang-Jin Wei, Xiaobo Zhang, 2014-10-30
China's rise as an economic powerhouse raises a number of questions that are the subject of lively debate. How did the country do it? How applicable are the lessons of China's economic reform of the past thirty years to the challenges it faces in the next three decades? What does the detailed pattern of China's success and challenges look like at the sub-sectoral and sub-national levels and what does this mean for future policy? How will China's role as a global economic player evolve? The Oxford Companion to the Economics of China presents an original collection of perspectives on the Chinese economy's past, present and future. 99 entries written by the leading China analysts of our time. The topics covered include the China model, future prospects for China, China and the global economy, trade and the Chinese economy, macroeconomics and finance, urbanisation, industry and markets, agriculture and rural development, land, infrastructure and environment, population and labour, dimensions of wellbeing and inequality, health and education, gender equity, regional divergence in China and a selection of perspectives on some of China's provinces. The Editors are four global leaders in Chinese economic analysis and policy who between them have held or hold the following positions: Director General, International Food Policy Research Institute; Co-Editor, China Economic Review; President, Chinese Economists Society; Assistant Director of Research at the IMF; Principal Adviser to the Chief Economist of the World Bank and Professors of Economics at Ivy League Universities.

Islam and the Liberal State Stephen H. Jones, 2020-11-26
National identity and liberal democracy are recurrent themes in debates about Muslim minorities in the West. Britain is no exception with politicians responding to claims about Muslims' lack of integration by mandating the promotion of fundamental British values including democracy and individual liberty. This book engages with both these themes, addressing the lack of understanding about the character of British Islam and its relationship to the liberal state. It charts a gradual but decisive shift in British institutions concerned with Islamic education, Islamic law and Muslim representation since Muslims settled in the UK in large numbers in the 1950s. Based on empirical research including interviews undertaken over a ten-year period with Muslims and analysis of public events organized by Islamic institutions, Stephen Jones challenges claims about the isolation of British Islamic organizations and shows that they have decisively shaped themselves around British public and institutional norms. He argues that this amounts to the building of a distinctive British Islam. Using this narrative, the book makes the case for a variety of liberalism that is open to the expression of religious arguments in public and to associations between religious groups and the state. It also offers a powerful challenge to claims about the insularity of British Islamic institutions by showing how the national orientation of Islam called for by British policymakers is in fact already happening.

Vicious Circuits Joseph Jonghyun Jeon, 2019-03-12
In December of 1997, the International Monetary Fund announced the largest bailout package in its history aimed at stabilizing the South Korean economy in response to a credit and currency crisis of the same year. *Vicious Circuits* examines what it terms Korea's IMF

Cinema the decade of cinema following that crisis in order to think through the transformations of global political economy at the end of the American century It argues that one of the most dominant traits of the cinema that emerged after the worst economic crisis in the history of South Korea was its preoccupation with economic phenomena As the quintessentially corporate art form made as much in the boardroom as in the studio film in this context became an ideal site for thinking through the global political economy in the transitional moment of American decline and Chinese ascension With an explicit focus of state economic policy IMF cinema did not just depict the economy it also was this economy's material embodiment That is it both represented economic developments and was itself an important sector in which the same pressures and changes affecting the economy at large were at work Joseph Jonghyun Jeon's window on Korea provides a peripheral but crucial perspective on the operations of late US hegemony and the contradictions that ultimately corrode it

Russia's Arctic Strategies and the Future of the Far North Marlene Laruelle, 2015-01-28 This book offers the first comprehensive examination of Russia's Arctic strategy ranging from climate change issues and territorial disputes to energy policy and domestic challenges As the receding polar ice increases the accessibility of the Arctic region rival powers have been manoeuvring for geopolitical and resource security Geographically Russia controls half of the Arctic coastline 40 percent of the land area beyond the Circumpolar North and three quarters of the Arctic population In total the sea and land surface area of the Russian Arctic is about 6 million square kilometres Economically as much as 20 percent of Russia's GDP and its total exports is generated north of the Arctic Circle In terms of resources about 95 percent of its gas 75 percent of its oil 96 percent of its platinum 90 percent of its nickel and cobalt and 60 percent of its copper reserves are found in Arctic and Sub Arctic regions Add to this the riches of the continental shelf seabed and waters ranging from rare earth minerals to fish stocks After a spike of aggressive rhetoric when Russia planted its flag in the Arctic seabed in 2007 Moscow has attempted to strengthen its position as a key factor in developing an international consensus concerning a region where its relative advantages are manifest despite its diminishing military technological and human capacities
