unfolding and highly significant demographic economic technological environmental urban and socio political transitions
 Africa s economic performance is promising with booming cities supporting growing middle classes and creating sizable
 consumer markets Despite significant overall growth the continent continues to suffer under very rapid urban growth
 accompanied by massive urban poverty and many other social problems These seem to indicate that the development
 trajectories followed by African nations since post independence may not be able to deliver on the aspirations of broad based
 human development and prosperity for all This report therefore argues for a bold re imagining of prevailing models in order
 to steer the ongoing transitions towards greater sustainability based on a thorough review of all available options That is
 especially the case since the already daunting urban challenges in Africa are now being exacerbated by the new
 vulnerabilities and threats associated with climate and environmental change *Report ,1964 Annual Report Michigan.*
