**Patriarchy Inc.** Cordelia Fine,2025-08-19 A razor sharp and quick witted analysis of why we need a new approach to fixing the gender inequality embedded in work Work remains much as it always has men occupy the vast majority of leadership roles and are overrepresented in positions from engineer to plumber We see many jobs as male or female with women dominating in healthcare and childcare professions Pretending that this is the natural state of things or that instead both sexes should submit to working 24 7 is just not right In Patriarchy Inc Cordelia Fine examines with razor sharp and quick witted analysis why gender inequality is embedded in the workplace and why it has to change Drawing on theories

from evolutionary science psychology economics and sociology she examines two of the most prominent movements in the corporate world The Different But Equal viewpoint espouses that women are in the jobs they want despite their lower status and salaries In the meantime DEI Diversity Equity Inclusion has become a slogan that emphasizes productivity and profit not fair pay Fine shows how both are wrong and the bad effects on everyone when men are still stuck in traditional breadwinner roles and women are having to fight for their due Offering perceptive and much needed insight into the current state of work Patriarchy Inc explores how we can get closer to achieving equality even if it means upturning business as usual *Hominid Evolution* Herbert Ullrich,1999 Human Evolution , **MORPHOLOGY OF THE PRIMATES AND HUMAN**

**Understanding Climate's Influence on Human Evolution** National Research Council, Division on Earth and Life Studies, Board on Earth Sciences and Resources, Committee on the Earth System Context for Hominin Evolution, 2010-03-17 The hominin fossil record documents a history of critical evolutionary events that have ultimately shaped and defined what it means to be human including the origins of bipedalism the emergence of our genus *Homo* the first use of stone tools increases in brain size and the emergence of *Homo sapiens* tools and culture The Earth's geological record suggests that some evolutionary events were coincident with substantial changes in African and Eurasian climate raising the possibility that critical junctures in human evolution and behavioral development may have been affected by the environmental characteristics of the areas where hominins evolved *Understanding Climate's Change on Human Evolution* explores the opportunities of using scientific research to improve our understanding of how climate may have helped shape our species Improved climate records for specific regions will be required before it is possible to evaluate how critical resources for hominins especially water and vegetation would have been distributed on the landscape during key intervals of hominin history Existing records contain substantial temporal gaps The book's initiatives are presented in two major research themes first determining the impacts of climate change and climate variability on human evolution and dispersal and second integrating climate modeling environmental records and biotic responses *Understanding Climate's Change on Human Evolution* suggests a new scientific program for international climate and human evolution studies that involve an exploration initiative to locate new fossil sites and to broaden the geographic and temporal sampling of the fossil and archeological record a comprehensive and integrative scientific drilling program in lakes lake bed outcrops and ocean basins surrounding the regions where hominins evolved and a major investment in climate modeling experiments for key time intervals and regions that are critical to understanding human evolution
