Ks1 Maths 2005 Teachers Guide:

Developing Active Learning in the Primary Classroom Anitra Vickery, 2013-10-10 Establishing an effective learning environment in the classroom requires a clear understanding of different teaching strategies that make children active participants in their own learning This book explores a range of philosophies and strategies to develop active learning in primary education It balances theory with practice to provide evidence based guidance and suggestions for use in the classroom Key topics include Creating a supportive learning environment Developing the questioning skills of teachers and children Learning through assessment Developing thinking skills through curriculum subjects Active learning in early years education Philosophy for Children P4C Frameworks to promote thinking This is essential reading for professional studies modules on primary initial teacher education courses including university based PGCE PGDE BA QTS BEd school based SCITT School Direct and employment based routes into teaching It also serves as a handbook for schools that are developing their approaches to active learning Anitra Vickery works as senior lecturer in primary mathematics education and the Professional Studies Coordinator at Bath Spa University

Using their Brains in Science Hellen Ward, 2007-10-22 This is a fascinating and very useful book I cannot recommend it highly enough It will inspire you School Science Review By focusing on active ways to help 5 to 14 year olds improve their thinking and learning skills in science this book provides teachers with inspiration and ideas for ways to teach creative enjoyable and interesting science lessons Linked to up to date research in brain based learning the author gives practical advice on topics including o ways to motivate pupils o developing pupils skills of detection o the importance of using movement to promote learning o improving pupils language skills and understanding of scientific vocabulary o suggestions for different ways learners can record in science o effective strategies for assessing learning in science o ideas to promote creativity o the importance of using ICT to support and promote learning This book is an inspirational read for teachers student teachers and teaching assistants and anyone interested in science and how children learn Helen Ward is Senior Lecturer at Canterbury Christ Church University Programme Director for the Modular PGCE at Christ Church and also an independent education consultant and active member of the Association for Science Education ASE

The Teaching of Science in Primary Schools Wynne Harlen OBE, 2017-08-04 The Teaching of Science in Primary Schools provides essential information for all concerned with primary school education about all aspects of teaching science It pays particular attention to inquiry based teaching and learning because of the more general educational benefits that follow from using this approach These benefits are often expressed in terms of developing general scientific literacy and fostering the ability to learn and the motivation to continue learning This book also aims to help teachers focus on the big or powerful ideas of science rather than teaching a series of unrelated facts This leads children to an understanding of the nature and limitations of scientific activity This fully expanded and updated edition explores The compelling reasons for starting science in the primary school Within school planning in the context of less prescriptive

national requirements The value of having in mind the big ideas of science The opportunities for children to learn through greater access to the internet and social networking The expanding sources of materials and guidance now available to teachers on line Greater attention to school and teacher self evaluation as a means of improving provision for children s learning The importance for both teachers and learners of reflecting on the process and content of their activities Other key aspects of teaching such as questioning the importance of discussion and dialogue the formative and summative roles of assessment and strategies for helping children to develop understanding skills positive attitudes and enjoyment of science are preserved So also is the learner centred approach with an emphasis on children learning to take some responsibility for their activities This book is essential reading for all primary school teachers and those on primary education courses

Primary ICT: Extending Knowledge in Practice John Duffy,2006-08-15 Still the biggest concern for many on initial teacher training courses is the acquisition of subject knowledge and the ability to translate that into effective teaching This book addresses this building on the core subject knowledge covered in the Achieving QTS series and relating it to classroom practice It supports trainees in extending and deepening their knowledge of ICT and demonstrating how to apply it to planning and implementing lessons Practical and up to date teaching examples are used to clearly contextualize subject knowledge A clear focus on classroom practice helps trainees to build confidence and develop their own teaching strategies

It provides a structured approach for systematically developing children's greater depth maths skills and knowledge. **Using and Applying Mathematics at Key Stage 1** Elaine Sellers, Sue Lowndes, 2013-04-03 All pupils able children included need to be taught strategies to enable their thinking skills to progress. They also need help with developing different approaches to problem solving. A sustained piece of work that requires perseverance, logical strategies and refinement of method and extension of the original task is not the same as a straightforward quick fix type problem. Both types of problem solving need to be taught. This book presents a series of activities that can be used with whole classes to provide a curriculum for the teaching of problem solving and the development of thinking skills. Each tried and tested investigation is clearly explained with ideas on how to introduce the task to a class, full solutions and resource sheets. Activities include making 10p a task to encourage systematic listing, tables and chairs working systematically and spotting patterns, polygons and polyhedra, investigating diagonals, triangles, faces, edges and vertices, hidden faces, investigating different shapes and sizes of dice and pond borders, investigating area and perimeter. Digging Into Math - Stage a Teacher's Guide SMC Curriculum, 2013-08-01 *Teachers' Guide* Nick Alexopoulos, 1989 All activities in the Maths big book are linked to activities in the Teachers guide.
