Product Portfolio Management and Corporate Performance in the Banking Sector Gerald Vinten,2005 Methodologies of Legal Research Mark Van Hoecke,2011-02-28 Until quite recently questions about methodology in legal research have been largely confined to understanding the role of doctrinal research as a scholarly discipline In turn this has involved asking questions not only about coverage but fundamentally questions about the identity of the discipline Is it mainly descriptive hermeneutical or normative Should it also be explanatory Legal scholarship has been torn between on the one hand grasping the expanding reality of law and its context and on the other reducing this complex whole to manageable proportions The purely internal analysis of a legal system isolated from any societal context remains an option and is still seen in the approach of the French academy but as law aims at ordering society and influencing human behaviour this approach is felt by many scholars to be insufficient Consequently many attempts have been made to conceive legal research differently Social scientific and comparative approaches have proven fruitful However does the introduction of other approaches leave merely a residue of legal doctrine to which pockets of social sciences can be added or should legal doctrine be merged with the social sciences What would such a broad interdisciplinary field look like and what would its methods be This book is an
