Local Government Capital Asset Management Guideline:

Measurement in Public Sector Financial Reporting Josette Caruana, Marco Bisogno, Mariafrancesca Sicilia, 2023-03-20 Measurement in Public Sector Financial Reporting presents a constructive and thoughtful analysis of possible valuation methodologies for the public sector context and related peculiarities and critical issues *Towards applying a green infrastructure approach in the Gauteng City-Region* Christina Culwick, Samkelisiwe Khanyile, Kerry Bobbins, Stuart Dunsmore, Anne Fitchett, Lerato Monama, Raishan Naidu, Gillian Sykes, Jennifer van den Bussche, Marco Vieira, 2019-12-11 In the context of heightened climate variability thinking about ways to redesign our urban areas with more sustainable infrastructure solutions is becoming more and more important Green infrastructure GI is emerging as an alternative approach to traditional grey infrastructure in urban planning and development Its emergence can be understood in terms of the growing demand for infrastructure and services increased concerns over natural resource constraints and climate change and the negative impacts associated with traditional approaches to designing and building cities It has been proposed that GI can provide the same services as traditional infrastructure at a similar capital cost while also providing a range of additional benefits However despite the increasing examples of successful urban GI applications traditional infrastructure continues to dominate due to the lack of systematic evidence to support GI implementation As a result there has been an increase in calls from policy and decision makers for a greater evidence base on the benefits of GI as well as for practical guidelines on its implementation Towards applying a green infrastructure approach in the Gauteng City Region is the GCRO s third report in its ongoing research into Green assets and infrastructure The first two reports in this project series were more theoretically grounded and policy oriented whereas this third report is more practical in nature The first report explored the basic principles around GI assessed the extent of ecological features in Gauteng and the way governments in the province think about planning and maintenance of green assets The second report responded to some of the challenges identified in the first report and in particular the importance of government officials and practitioners in exploring how international green infrastructure plans could be applied in the Gauteng context This third report builds on the findings of the aforementioned reports and the project s CityLab series which highlighted the need to build an evidence base as critical for garnering support for and as well as enhancing investment in the GI approach Unlike the more theoretically grounded earlier reports this report comprises four technical sections and practical reflections on how a GI approach could be incorporated into urban planning in the GCR and in other similar urban contexts *15th WCEAM Proceedings* João Onofre Pereira Pinto, Marcio Luiz Magri Kimpara, Renata Rezende Reis, Turuna Seecharan, Belle R. Upadhyaya, Joe Amadi-Echendu, 2022-03-24 This book gathers selected peer reviewed papers from the 15th World Congress on Engineering Asset Management WCEAM which was hosted by The Federal University of Mato Grosso do Sul Campo Grande Brazil from 15 18 August 2021 This book covers a wide range of topics in engineering asset management including

strategy and standards sustainability and resiliency servitisation and Industry 4.0 business models asset information systems and asset management decision making The breadth and depth of these state of the art comprehensive proceedings make them an excellent resource for asset management practitioners researchers and academics as well as undergraduate and postgraduate students
