

Chapter 1

Managerial Accounting and Cost Concepts

Questions

1-1 The three major types of product costs in a manufacturing company are direct materials, direct labor, and manufacturing overhead.

1-2

- a. Direct materials are an integral part of a finished product and their costs can be conveniently traced to it.
- b. Indirect materials are generally small items of material such as glue and nails. They may be an integral part of a finished product but their costs can be traced to the product only at great cost or inconvenience.
- c. Direct labor consists of labor costs that can be easily traced to particular products. Direct labor is also called "touch labor."
- d. Indirect labor consists of the labor costs of janitors, supervisors, materials handlers, and other factory workers that cannot be conveniently traced to particular products. These labor costs are incurred to support production, but the workers involved do not directly work on the product.
- e. Manufacturing overhead includes all manufacturing costs except direct materials and direct labor. Consequently, manufacturing overhead includes indirect materials and indirect labor as well as other manufacturing costs.

1-3 A product cost is any cost involved in purchasing or manufacturing goods. In the case of manufactured goods, these costs consist of direct materials, direct labor, and manufacturing overhead. A period cost is a cost that is taken directly to the income statement as an expense in the period in which it is incurred.

1-4

- a. Variable cost: The variable cost per unit is constant, but total variable cost changes in direct proportion to changes in volume.
- b. Fixed cost: The total fixed cost is constant within the relevant range. The average fixed cost per unit varies inversely with changes in volume.
- c. Mixed cost: A mixed cost contains both variable and fixed cost elements.

1-5

- a. Unit fixed costs decrease as the activity level increases.
- b. Unit variable costs remain constant as the activity level increases.
- c. Total fixed costs remain constant as the activity level increases.
- d. Total variable costs increase as the activity level increases.

1-6

- a. Cost behavior: Cost behavior refers to the way in which costs change in response to changes in a measure of activity such as sales volume, production volume, or orders processed.
- b. Relevant range: The relevant range is the range of activity within which assumptions about variable and fixed cost behavior are valid.

1-7 An activity base is a measure of whatever causes the incurrence of a variable cost. Examples of activity bases include units produced, units sold, letters typed, beds in a hospital, meals served in a cafe, service calls made, etc.

1-8 The linear assumption is reasonably valid providing that the cost formula is used only within the relevant range.

Managerial Accounting Chapter 4 Solutions:

Management Accounting Carsten Berkau, 2023-09-25 Management Accounting is a textbook for business management study programmes. It covers the international syllabus of cost accounting and controlling on bachelor's and master's levels. Prof. Berkau has more than 25 years of teaching experience in Germany, UAS Osnabrück and at international universities in South Africa, Malaysia, China, the Netherlands and South Korea. The textbook strictly follows a case study based approach. All methods are discussed by easily understandable cases. The calculations demonstrate how to apply management accounting step by step. In the first chapters, the case study PENOR PLC about a British windows doors manufacturer explains the differences between financial accounting IFRSs and management accounting. In the next following sections, the textbook covers two points of view: 1. a controlling view with budgeting, cost volume profit analysis, degree of operating leverage, investment appraisal, mergers and cross border acquisitions and risk valuation Monte Carlo Simulation. 2. a cost accounting view that covers management accounting systems, flexible budgeting, cost allocation methods, performance measurement, monitoring, reporting, product calculation, manufacturing accounting, job order and process costing, activity based costing, target costing and contribution margin accounting. On the UVK website, numerous exam tasks with complete solutions, further study materials and links to video clips produced by Prof. Berkau are available for download. [Study Guide to accompany](#)

[Managerial Accounting](#) James Jiambalvo, 2000-09-26 The text is current, concise and clearly written with cases at the end of each chapter to illustrate the material. An interactive CD lets students test and expand their understanding with multiple choice questions, key term matching exercises, demonstrations of various concepts and techniques, critical thinking exercise, interactive cases and videos. A dynamic Web site provides test study guides, exercises, games, web testing, relevant articles from The Wall Street Journal and other sources linked to the text, links to relevant web sites, additional cases and other materials.

Managerial Accounting Michael Maher, Clyde P. Stickney, Roman L. Weil, 2006 This classic text for MBA programs offers balanced coverage of concepts, methods and uses of managerial accounting with an increasingly strong emphasis on management decision making. This approach helps focus on concepts and managerial uses of financial information rather than techniques of cost accounting. The current edition emphasizes international issues, strategic effects of decisions, ethics and new management accounting trends. Also emphasized are process improvement, integration of financial reporting issues for management decision making and application of managerial accounting tools to the emerging service sector, government and nonprofits in examples and problem material. **A Textbook of Cost and Management**
