

Chapter 1

Managerial Accounting and Cost Concepts

Questions

1-1 The three major types of product costs in a manufacturing company are direct materials, direct labor, and manufacturing overhead.

1-2

- a. Direct materials are an integral part of a finished product and their costs can be conveniently traced to it.
- b. Indirect materials are generally small items of material such as glue and nails. They may be an integral part of a finished product but their costs can be traced to the product only at great cost or inconvenience.
- c. Direct labor consists of labor costs that can be easily traced to particular products. Direct labor is also called "touch labor."
- d. Indirect labor consists of the labor costs of janitors, supervisors, materials handlers, and other factory workers that cannot be conveniently traced to particular products. These labor costs are incurred to support production, but the workers involved do not directly work on the product.
- e. Manufacturing overhead includes all manufacturing costs except direct materials and direct labor. Consequently, manufacturing overhead includes indirect materials and indirect labor as well as other manufacturing costs.

1-3 A product cost is any cost involved in purchasing or manufacturing goods. In the case of manufactured goods, these costs consist of direct materials, direct labor, and manufacturing overhead. A period cost is a cost that is taken directly to the income statement as an expense in the period in which it is incurred.

1-4

- a. Variable cost: The variable cost per unit is constant, but total variable cost changes in direct proportion to changes in volume.
- b. Fixed cost: The total fixed cost is constant within the relevant range. The average fixed cost per unit varies inversely with changes in volume.
- c. Mixed cost: A mixed cost contains both variable and fixed cost elements.

1-5

- a. Unit fixed costs decrease as the activity level increases.
- b. Unit variable costs remain constant as the activity level increases.
- c. Total fixed costs remain constant as the activity level increases.
- d. Total variable costs increase as the activity level increases.

1-6

- a. Cost behavior: Cost behavior refers to the way in which costs change in response to changes in a measure of activity such as sales volume, production volume, or orders processed.
- b. Relevant range: The relevant range is the range of activity within which assumptions about variable and fixed cost behavior are valid.

1-7 An activity base is a measure of whatever causes the incurrence of a variable cost. Examples of activity bases include units produced, units sold, letters typed, beds in a hospital, meals served in a cafe, service calls made, etc.

1-8 The linear assumption is reasonably valid providing that the cost formula is used only within the relevant range.

Use Schaum's to shorten your study time and get your best test scores. Schaum's Outlines Problem Solved

Management Accounting: Principles & Applications Jill Hart, Clive Wilson, Chris Fergus, 2012-05-17 The 5th edition of Management Accounting Principles and Applications helps students master the complexity of cost and management accounting. Using a clear, concise writing style, logical structure, and current accounting standards, the text focuses on the information students need to complete their course.

Introduction to Management Accounting Peter Scott, 2018 Peter Scott's Introduction to Management Accounting provides a thorough but accessible and engaging introduction to the subject for first-year students. This highly practical textbook uses a multitude of worked and real-life examples, supportive learning features, crystal-clear explanations, and extensive online resources, all fully integrated with the book, to guide students towards a confident understanding of the fundamentals of management accounting. Scott's lively writing style sets the numerical content within an easy-to-follow narrative, and the real-life relevance of each tool or technique is explained at every turn. All key areas of first-year management accounting courses are covered to provide a solid foundation for more advanced modules. The book's online resources include a wealth of materials which can be downloaded into a university's local VLE. The student resources include Interactive Multiple Choice Questions for revising key topics, Numerical exercises for practising the calculation of accounting information from given sets of data, Go back over this again features containing a mix of further examples, written exercises, true or false questions, and annotated accounting information to help consolidate learning and revise or revisit concepts. Show me how to do it videos that provide practical demonstrations of dealing with more complex accounting tasks. Web links for primary source material and articles through which readers can learn more about the companies and organizations discussed in the book. Lecturer resources include PowerPoint slides, examples and solutions, and hundreds of ready-to-use multiple choice questions, all arranged by chapter. Lecturers can choose to make the online materials available to their students via Dashboard, a learning and assessment tool which provides sophisticated analytics for student achievement and engagement with the resources, also facilitating discussions and course updates.
