*Towering Above Harlem* Steven Gregory, 2025-09-16 Charts racialized and class based exclusion in Morningside Heights and its surrounding area by elite institutions New York City's storied diversity has also been a story of racialized class discrimination *Towering Above Harlem* focuses on understudied players in this process the elite institutions of Morningside Heights Columbia University Teachers College and the Riverside Church to reveal the troubling ways in which they exploited existing geographic features to build a racially and economically exclusive city on a hill In his final book length work Steven Gregory explores the long history of economic and racial discrimination in Morningside Heights beginning in the late 19th century and extending into the present day This exclusion of the surrounding racial minorities and working class population has been enacted physically through the acquisition of property by Columbia and others but it has also been enacted through a variety of discourses and practices aimed at setting apart the so called civilization building mission of the elites overlooking Harlem from the racialized others in the vicinity The book shows that the major institutions of Morningside Heights have since the beginning tried to physically secede from the Black and Puerto Rican communities geographically below the Morningside plateau while also symbolically rising above them as beacons of progress The volume charts the coordinated effort among elites to use space to naturalize relations of power and prestige illuminating the past present and uncertain future of racial discrimination and exclusivity in Morningside Heights and in New York City at large

*West Harlem Morningside* Architect's Renewal Committee in Harlem, Inc, 1968 **Daydreams and Nightmares** Irving Louis Horowitz, 1990 **The Roots of Urban Renaissance** Brian D. Goldstein, 2023-03-14 An acclaimed history of Harlem's journey from urban crisis to urban renaissance With its gleaming shopping centers and refurbished row houses today's Harlem bears little resemblance to the neighborhood of the midcentury urban crisis Brian Goldstein traces Harlem's Second

Renaissance to a surprising source the radical social movements of the 1960s that resisted city officials and fought to give Harlemites control of their own destiny Young Harlem activists inspired by the civil rights movement envisioned a Harlem built by and for its low income predominantly African American population In the succeeding decades however the community based organizations they founded came to pursue a very different goal a neighborhood with national retailers and increasingly affluent residents The Roots of Urban Renaissance demonstrates that gentrification was not imposed on an unwitting community by unscrupulous developers or opportunistic outsiders Rather it grew from the neighborhood s grassroots producing a legacy that benefited some longtime residents and threatened others      [Back Through History](#)
